Voice Feature Appliance Regulatory Guide

Regulatory Information

This guide applies to the following Model Number: WSMHWTR.

This HW model is currently used to host the following applications:

TEAM *Wireless Services Manager* (WSM), TEAM *Radio Link Solution* (RLS) applications, *Unified Retail Communications* (URC), and *Centralized Management Tool* (CMT).

All Zebra devices are designed to be compliant with rules and regulations in locations they are sold and will be labeled as required.

Country Selection

Select only the country in which you are using the device. Any other selection will make the operation of this device illegal.

Health and safety recommendations

CAUTION: In order to avoid or minimize the potential risk of ergonomic injury follow the recommendations below. Consult with your local Health & Safety Manager to ensure that you are adhering to your company's safety programs to prevent employee injury.

- Reduce or eliminate repetitive motion
- Maintain a natural position

Installation Safety Guidelines

Declared maximum operating temperature: 35°C (95°F).

- *Elevated operating ambient temperature* — If installed in a closed or multi-unit rack assembly, the operating ambient temperature of the rack environment may be greater than room ambient. Therefore, consideration should be given to installing the equipment in an environment compatible with the manufacturer's maximum rated ambient temperature (Tma). *Reduced air flow* — Installation in a rack should be such that the amount of airflow required for safe operation of the equipment is not compromised.
- *Mechanical loading* — Mounting of the equipment in the racks should be such that a hazardous condition is not achieved due to uneven mechanical loading.
- *Circuit overloading* — Consideration should be given to the connection of the equipment to the supply circuit and the effect that overloading of circuits might have on overcurrent protection and supply wiring. Appropriate consideration of equipment ratings should be used when addressing this concern.
- *Reliable earthing* — Reliable earthing of rack-mounted equipment should be maintained. Particular attention should be given to supply connections other than direct connections to the branch circuit (i.e. use of power strip etc.).
- *Spurious Emission Limit* — To meet the spurious emission limit, all cables should be shielded including USB (eg RJ45 cable) and Ethernet cable.

Radio frequency interference requirements - FCC

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

Radio Frequency Interference Requirements-Canada
This Class A digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

Marking and European Economic Area(EEA)

WARNING: This is a Class A product. In a domestic environment this product may cause radio interference in which case the use may be required to take adequate measures.

Statement of Compliance

Zebra hereby declares that this device is in compliance with all the applicable Directives, 2004/108/EC, 2006/95/EC.
A Declaration of Conformity (DoC) may be obtained from www.zebra.com/doc
