For Australia Only

For Australia Only. This warranty is given by Zebra Technologies Asia Pacific Pte. Ltd., 71 Robinson Road, #05-02/03, Singapore 068895, Singapore. Our goods come with guarantees that cannot be excluded under the Australia Consumer Law. You are entitled to a replacement or refund for a major failure and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Zebra Technologies Corporation Australia’s limited warranty above is in addition to any rights and remedies you may have under the Australian Consumer Law. If you have any queries, please call Zebra Technologies Corporation at +65 6858 0722. You may also visit our website: www.zebra.com for the most updated warranty terms.

Terms of Use

- Proprietary Statement
  This manual contains proprietary information of Zebra Technologies Corporation and its subsidiaries (“Zebra Technologies”). It is intended solely for the information and use of parties operating and maintaining the equipment described herein. Such proprietary information may not be used, reproduced, or disclosed to any other parties for any other purpose without the express, written permission of Zebra Technologies.

- Product Improvements
  Continuous improvement of products is a policy of Zebra Technologies. All specifications and designs are subject to change without notice.

- Liability Disclaimer
  Zebra Technologies takes steps to ensure that its published Engineering specifications and manuals are correct; however, errors do occur. Zebra Technologies reserves the right to correct any such errors and disclaims liability resulting therefrom.

- Limitation of Liability
  In no event shall Zebra Technologies or anyone else involved in the creation, production, or delivery of the accompanying product (including hardware and software) be liable for any damages whatsoever (including, without limitation, consequential damages including loss of business profits, business interruption, or loss of business information) arising out of the use of, the results of use of, or inability to use such product, even if Zebra Technologies has been advised of the possibility of such damages. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.
Revision History

Changes to the original manual are listed below:

<table>
<thead>
<tr>
<th>Change</th>

About This Guide

Introduction

The MC3300R RFID Mobile Computer Integrator Guide Supplement provides the unique set up and operating procedures for MC3300R RFID mobile computers. This guide is intended as a supplement to the MC33XX Integrator Guide, p/n MN-003136-xx. Procedures common to MC3300 products are addressed in the MC33XX Integrator Guide.

NOTE: Screens and windows pictured in this guide are samples and can differ from actual screens.

Chapter Descriptions

Topics covered in this guide are as follows:

- **Getting Started** provides information on RFID technology and MC3300R LED indications.
- **Zebra RFID Mobile Application for Android** for Android refers to the new 123RFID Mobile Application.
- **Accessories** describes the available accessories and how to use them with MC3300R devices.
- **RFID Manager** describes how to configure the Zebra RFID Manager Application for MC3300R devices.
- **Troubleshooting** describes cleaning, maintenance, and troubleshooting procedures.
- **StageNow** provides a reference to access this easy Wizard-based tool that allows even complex Staging profiles to become simple to create.
- **Import RFID Manager Into StageNow** provides instructions necessary to generate an RFID Firmware update profile and import RFID CSP plug-in into the StageNow application.
- **Troubleshooting** provides troubleshooting solutions for potential problems during MC3300R operation.
- **Technical Specifications** provides the technical specifications for MC3300R devices.

Notational Conventions

The following conventions are used in this document:

- “RFID mobile computer” refers to MC3300R RFID Mobile Computers.
- Bold text is used to highlight the following:
  - Dialog box, window and screen names
  - Drop-down list and list box names
  - Check box and radio button names
  - Icons on a screen
  - Key names on a keypad
  - Button names on a screen.
- Bullets (•) indicate:
  - Action items
  - Lists of alternatives
  - Lists of required steps that are not necessarily sequential
  - Sequential lists (e.g., those that describe step-by-step procedures) appear as numbered lists.

Icon Conventions

The documentation set is designed to give the reader more visual clues. The following graphic icons are used throughout the documentation set. These icons and their associated meanings are described below.

**NOTE:** NOTE contains information more important than the surrounding text, such as exceptions or preconditions. They also refer the reader elsewhere for additional information, remind the reader how to complete an action (when it is not part of the current procedure, for instance), or tell the reader where something is located on the screen. There is no warning level associated with a note.
Related Documents

The following documents provide more information about the reader.

For the latest version of this guide and all guides, go to: zebra.com/support.

Service Information

If you have a problem with your equipment, contact Zebra Support Center for your region. Contact information is available at: www.zebra.com/support.

When contacting the Zebra Support Center, please have the following information available:

- Serial number of the unit (found on manufacturing label)
- Model number or product name (found on manufacturing label)
- Software type and version number.
Zebra responds to calls by email or telephone within the time limits set forth in support agreements.

If the problem cannot be solved by the Zebra Support Center, the user may need to return the equipment for servicing and will be given specific directions. Zebra is not responsible for any damages incurred during shipment if the approved shipping container is not used. Shipping the units improperly can possibly void the warranty.

Remove the microSD card from the device before shipping for service.

If you purchased your product from a Zebra business partner, contact that business partner for support.

______________________________________________________________

**Provide Documentation Feedback**

If you have comments, questions, or suggestions about this guide, send an email to EVM-Techdocs@zebra.com.
Getting Started

Introduction

This chapter provides an overview of RFID technology and components, and describes the MC3300R RFID mobile computer LED indications.

RFID Technology Overview

RFID (Radio Frequency Identification) is an advanced automatic identification (Auto ID) technology that uses radio frequency signals to identify tagged items. An RFID tag contains a circuit that can store data. This data may be pre-encoded or can be encoded in the field. The tags come in a variety of shapes and sizes.

To read a tag, the mobile computer sends out radio frequency waves using its integrated antenna. This RF field powers and charges the tags, which are tuned to receive radio waves. The tags use this power to modulate the carrier signal. The reader interprets the modulated signal and converts the data to a format for computer storage. The computer application translates the data into an understandable format.

Figure 2  RFID System Elements
RFID Components

Zebra RFID solutions offer low cost, long read range, and a high read rate. These features provide real time end-to-end visibility of products and assets in the factory, distribution center, retail outlet, or other facility. The MC3300R RFID system consists of the following components:

Silicon-based RFID tags that attach to retail products, vehicles, trailers, containers, pallets, boxes, etc.

An integrated antenna that supports applications such as item level tracking and asset tracking.

An embedded radio module that powers and communicates with tags for data capture and provides host connectivity for data migration.

Tags

Tags contain embedded chips that store unique information. Available in various shapes and sizes, tags, often called transponders, receive and respond to data requests. Tags require power to send data.

There are several categories of tags based on the protocol they support, read/write memory, and power options:

Active RFID tags are powered by internal light-weight batteries, and also use these batteries to broadcast radio waves to the reader.

Semi-passive RFID tags are also powered by internal light-weight batteries, but draw broadcasting power from the reader.

Passive RFID tags are powered by a reader-generated RF field. These tags are much lighter and less expensive than active tags, and are typically applied to less expensive goods.

Antenna

Antennas transmit and receive radio frequency signals.

Radio Module

The radio module communicates with the tags and transfers the data to a host computer. It also provides features such as filtering, CRC check, and tag writing. The MC3300R RFID mobile computer supports standard RFID tags as described by EPCGlobalTM Class 1 Gen2 protocol.

LED Indications

The Charge LED Indicator indicates the charge status.

Setting Up the MC3300R

To start using the MC3300R for the first time:

- Ensure the battery is installed
- Charge the MC3300R
- Power on the MC3300R
- Remove MC3300R from charger
- Set the region and power level (using the RFID Manager Application, Demo Application, or the partner application).

- MC3300R mobile computers are compatible with all batteries (MC3300R PowerPrecision+ and MC32N0 PowerPrecision).
- MC3300R mobile computer is compatible with all cradles. An additional adapter is needed to use any MC32N0 cradle slot, which provides charge only, no communication.
- MC3300R battery charger slots are compatible with all batteries (MC3300R PowerPrecision+ and MC32N0 PowerPrecision).
- MC32N0 mobile computers are not compatible with MC3300R cradles.

Battery Compatibility

- MC3300R PowerPrecision+ batteries are compatible with all MC3300R mobile computers and accessories.
- MC3300R PowerPrecision+ batteries are not compatible with MC32N0 mobile computers and accessories.
- MC32N0 PowerPrecision batteries are compatible with all MC32N0 mobile computers and accessories.
- MC32N0 PowerPrecision batteries are compatible with all MC3300R mobile computers and accessories.
1-Slot USB Charge Cradle

The 1-Slot USB Charge Cradle:

- Provides 9 VDC power for charging the mobile computer and charging the battery.
- Provides 4.2 VDC power to charge the spare battery.
- Provides a USB port for data communication between the mobile computer and a host computer or other USB devices (e.g., a printer).
- Synchronizes information between the mobile computer and a host computer. With customized or third party software, it can also synchronize the mobile computer with corporate databases.
- Compatible with the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

Figure 3 1-Slot USB Charge Cradle Setup

Charging the MC3300R Battery

**NOTE:** To function properly, remove the lower part of the rubber boot or the entire rubber boot before placing in a charging cradle.

1. Ensure that the cradle is connected to power.
2. Slide the mobile computer into the slot in the cradle. The mobile computer Charge LED Indicator, indicates the mobile computer battery charging status. For charging status, see Table 6 on page 23
3. Gently press down on the device to ensure proper contact.
4. When charging is complete, remove the mobile computer from the cradle slot.

**Charging an MC3300R Spare Battery**

1. Ensure that the cradle is connected to power.
2. Insert the spare battery into the cradle, bottom first, and pivot the top of the battery down onto the contact pins.

3. Gently press down on the battery to ensure proper contact.
   The Spare Battery Charging LED on the front of the cradle indicates the spare battery charging status.
4. When charging is complete, lift the battery out of the slot.
Battery Charging in 1-Slot USB Charge Cradle

The 1-Slot USB charge cradle charges the MC3300R’s main battery and a spare battery simultaneously.

The MC3300R’s Charge LED indicates the status of the battery charging in the MC3300R. See Table 6 for charging status indications.

The spare battery charging LED on the cradle indicates the status of the spare battery charging in the cradle. See below for charging status indications.

</tbody>
</table>

The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 3.8 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the MC3300R or cradle alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC3300R or cradle indicates when charging is disabled due to abnormal temperatures via its LED.
5-Slot Charge Only ShareCradle

The 5-Slot Charge Only ShareCradle:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Simultaneously charges up to five mobile computers.
- Compatible with devices using the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

Figure 6 5-Slot Charge Only ShareCradle Setup

Charging the MC3300R Battery

**NOTE:** To function properly, remove the lower part of the rubber boot or the entire rubber boot before placing in a charging cradle.

1. Ensure that the cradle is connected to power.
2. Slide the mobile computer into the slot in the cradle. The mobile computer Charge LED Indicator, indicates the mobile computer battery charging status.
3. Gently press down on the device to ensure proper contact.
4. When charging is complete, remove the mobile computer from the cradle slot.

Battery Charging in the 5-Slot Charge Only ShareCradle

The MC3300R’s Charge LED indicates the status of the battery charging in the MC3300R. See Table 10 on page 42 for charging status indications.
The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 3.8 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

**Charging Temperature**

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the MC3300R or cradle alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC3300R or cradle indicates when charging is disabled due to abnormal temperatures via its LED.
5-Slot Ethernet ShareCradle

The 5-Slot Ethernet ShareCradle:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Simultaneously charges up to five mobile computers.
- Compatible with devices using the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

**Figure 7** 5-Slot Ethernet ShareCradle Setup

Charging the MC3300R Battery

**NOTE:** To function properly, remove the lower part of the rubber boot or the entire rubber boot before placing in a charging cradle.

1. Ensure that the cradle is connected to power.
2. Slide the mobile computer into the slot in the cradle. The mobile computer amber Charge LED Indicator, indicates the mobile computer battery charging status.
3. Gently press down on the device to ensure proper contact.
4. When charging is complete, remove the mobile computer from the cradle slot.
Battery Charging in the 5-Slot Ethernet ShareCradle

The MC3300R’s Charge LED indicates the status of the battery charging in the MC3300R. See Table 10 on page 42 for charging status indications.

The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 3.8 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the MC3300R or cradle alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC3300R or cradle indicates when charging is disabled due to abnormal temperatures via its LED.

Daisy-chaining Ethernet ShareCradles

Daisy-chain up to ten 5-Slot Ethernet ShareCradles to connect several cradles to an Ethernet network. Use either a straight or crossover cable. Daisy-chaining should not be attempted when the main Ethernet connection to the first cradle is 10 Mbps or throughput issues are likely to occur.

To daisy-chain 5-Slot Ethernet ShareCradles:

1. Connect power to each 5-Slot Ethernet ShareCradle.
2. Connect an Ethernet cable to one of the ports on the switch and the other end to the Primary Port of the first cradle.
3. Connect an Ethernet cable to the Secondary port of the first cradle.
4. Connect the other end of the Ethernet cable to the Primary port of the next 5-Slot Ethernet ShareCradle.
Figure 8 Daisy-chaining 5-Slot Ethernet ShareCradles

5. Connect additional cradles as described in step 3 and 4.

Ethernet Settings

The following settings can be configured when using Ethernet communication:

- Proxy Settings
- Static IP.

Configuring Ethernet Proxy Settings

The MC3300R includes Ethernet cradle drivers. After inserting the MC3300R, configure the Ethernet connection:

1. Swipe down from the status bar to open the quick access panel and then touch 🔧.
2. Touch 🌐 Ethernet.
3. Slide the switch to the ON position.
4. Place the MC3300R into the Ethernet cradle slot.
5. Touch and hold eth0 until the menu appears.
6. Touch Modify Proxy.
7. Touch the Proxy drop-down list and select Manual.
8. In the **Proxy hostname** field, enter the proxy server address.
9. In the **Proxy port** field, enter the proxy server port number.

**NOTE:** When entering proxy addresses in the Bypass proxy for field, do not use spaces or carriage returns between addresses.

10. In the **Bypass proxy for** text box, enter addresses for web sites that do not require to go through the proxy server. Use the separator "|" between addresses.
11. Touch **MODIFY**.
12. Touch .

**Configuring Ethernet Static IP Address**

The MC3300R includes Ethernet cradle drivers. After inserting the MC3300R, configure the Ethernet connection:

1. Swipe down from the status bar to open the quick access panel and then touch 🛠.
2. Touch 🔄 Ethernet.
3. Slide the switch to the **ON** position.
4. Place the MC3300R into the Ethernet cradle slot.
5. Touch **eth0**.
6. Touch **Disconnect**.
7. Touch **eth0**.
8. Touch the IP settings drop-down list and select **Static**.
9. In the **IP** address field, enter the proxy server address.
10. If required, in the **Gateway** field, enter a gateway address for the device.
11. If required, in the **Netmask** field, enter the network mask address
12. If required, in the **DNS** address fields, enter a Domain Name System (DNS) addresses.
13. Touch **CONNECT**.
14. Touch ☑.

**Establishing Ethernet Connection**

1. Swipe down from the status bar to open the quick access panel and then touch ☐.
2. Touch **Ethernet**.
3. Slide the Ethernet switch to the **ON** position.
4. Insert the device into a slot.
   The ☐ icon appears in the Status bar.
5. Touch **eth0** to view Ethernet connection details.
LED Indicators

There are two green LEDs on the side of the cradle. These green LEDs light and blink to indicate the data transfer rate.

Table 7  LED Data Rate Indicators

4-Slot ShareCradle with 4-Slot Battery Charger

The 4-Slot ShareCradle with 4-Slot Battery Charger:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Provides 4.2 VDC power for charging spare batteries.
- Simultaneously charges up to four mobile computers and four spare batteries.
- Compatible with the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

Figure 11 4-Slot ShareCradle with 4-Slot Battery Charger Setup

Charging the MC3300R Battery

**NOTE:** To function properly, remove the lower part of the rubber boot or the entire rubber boot before placing in a charging cradle.

1. Ensure that the cradle is connected to power.
2. Slide the mobile computer into the slot in the cradle. The mobile computer amber Charge LED Indicator, indicates the mobile computer battery charging status.
3. Gently press down on the device to ensure proper contact.
4. When charging is complete, remove the mobile computer from the cradle slot.
Charging Spare Batteries

Insert the battery into the charger and gently press down on the battery to ensure proper contact.

Battery Charging in the 4-Slot ShareCradle with 4-Slot Battery Charger

The MC3300R’s Charge LED or the spare battery LED indicates the status of the battery charging in the MC3300R. See Table 9 on page 40 for charging status indications.

The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 3.8 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the MC3300R or cradle alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC3300R or cradle indicates when charging is disabled due to abnormal temperatures via its LED.
4-Slot Ethernet ShareCradle with 4-Slot Battery Charger

The 4-Slot Ethernet ShareCradle with 4-Slot Battery Charger:

- Provides 9 VDC power for operating the mobile computer and charging the battery.
- Provides 4.2 VDC power for charging spare batteries.
- Simultaneously charges up to four mobile computers and four spare batteries.
- Compatible with the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

Charging the MC3300R Battery

**NOTE:** To function properly, remove the lower part of the rubber boot or the entire rubber boot before placing in a charging cradle.

1. Ensure that the cradle is connected to power.
2. Slide the mobile computer into the slot in the cradle. The mobile computer amber Charge LED Indicator, indicates the mobile computer battery charging status.
3. Gently press down on the device to ensure proper contact.
4. When charging is complete, remove the mobile computer from the cradle slot.
Charging Spare Batteries

Insert the battery into the charger and gently press down on the battery to ensure proper contact.

Battery Charging in the 4-Slot Ethernet ShareCradle with 4-Slot Battery Charger

The MC3300R’s Charge LED or the spare battery LED indicates the status of the battery charging in the MC3300R. See Table 9 on page 40 for charging status indications.

The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 3.8 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the MC3300R or cradle alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC3300R or cradle indicates when charging is disabled due to abnormal temperatures via its LED.

Daisy-chaining Ethernet Cradles

Daisy-chain up to ten 5-Slot Ethernet ShareCradle with 4-Slot Battery Chargers to connect several cradles to an Ethernet network. Use either a straight or crossover cable. Daisy-chaining should not be attempted when the main Ethernet connection to the first cradle is 10 Mbps as throughput issues are likely to occur.

To daisy-chain 5-Slot Ethernet ShareCradle with 4-Slot Battery Chargers:

1. Connect power to each 5-Slot Ethernet ShareCradle with 4-Slot Battery Charger.
2. Connect an Ethernet cable to one of the ports on the switch and the other end to the Primary Port of the first cradle.
3. Connect an Ethernet cable to the Secondary port of the first cradle.
4. Connect the other end of the Ethernet cable to the Primary port of the next 5-Slot Ethernet ShareCradle with 4-Slot Battery Charger.
Figure 13  Daisy-chaining 5-Slot Ethernet ShareCradle with 4-Slot Battery Chargers

5. Connect additional cradles as described in step 3 and 4.

**Ethernet Settings**

The following settings can be configured when using Ethernet communication:

- Proxy Settings
- Static IP.

**Configuring Ethernet Proxy Settings**

The MC3300R includes Ethernet cradle drivers. After inserting the MC3300R, configure the Ethernet connection:

1. Swipe down from the status bar to open the quick access panel and then touch ．
2. Touch ．Ethernet．
3. Slide the switch to the ON position.
4. Place the MC3300R into the Ethernet cradle slot.
5. Touch and hold eth0 until the menu appears.
6. Touch Modify Proxy.
7. Touch the Proxy drop-down list and select Manual.
8. In the **Proxy hostname** field, enter the proxy server address.
9. In the **Proxy port** field, enter the proxy server port number.

**NOTE:** When entering proxy addresses in the Bypass proxy for field, do not use spaces or carriage returns between addresses.

10. In the **Bypass proxy for** text box, enter addresses for web sites that do not require to go through the proxy server. Use the separator “|” between addresses.
11. Touch **MODIFY**.
12. Touch .

### Configuring Ethernet Static IP Address

The MC3300R includes Ethernet cradle drivers. After inserting the MC3300R, configure the Ethernet connection:

1. Swipe down from the status bar to open the quick access panel and then touch 🔄.
2. Touch 🔄 **Ethernet**.
3. Slide the switch to the **ON** position.
4. Place the MC3300R into the Ethernet cradle slot.
5. Touch **eth0**.
6. Touch **Disconnect**.
7. Touch **eth0**.
8. Touch the IP settings drop-down list and select **Static**.
9. In the IP address field, enter the proxy server address.
10. If required, in the Gateway field, enter a gateway address for the device.
11. If required, in the Netmask field, enter the network mask address
12. If required, in the DNS address fields, enter a Domain Name System (DNS) addresses.
13. Touch CONNECT.
14. Touch .

Establishing Ethernet Connection

1. Swipe down from the status bar to open the quick access panel and then touch .
2. Touch Ethernet.
3. Slide the Ethernet switch to the ON position.
4. Insert the device into a slot.
   The icon appears in the Status bar.
5. Touch eth0 to view Ethernet connection details.
LED Indicators

There are two green LEDs on the side of the cradle. These green LEDs light and blink to indicate the data transfer rate.

4-Slot Spare Battery Charger

The 4-Slot Battery Charger:

- Charges up to four MC3300R spare batteries.
- Provides 4.2 VDC power to charge the spare battery.
- Compatible with the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

Charging Spare Batteries

1. Connect the charger to a power source.
2. Insert the battery into the charger and gently press down on the battery to ensure proper contact.
Battery Charging

Spare Battery Charging

Each Battery Charging LED indicates the status of the battery charging in each slot. The table below describes the Battery Charging LED status.

</table>
The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 3.8 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

**Charging Temperature**

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the charger alternately enables and disables battery charging to keep the battery at acceptable temperatures. The charger indicates when charging is disabled due to abnormal temperatures via its LED.

---

**20-Slot Spare Battery Charger**

The 20-Slot Battery Charger:

- Charges up to twenty MC3300R spare batteries.
- Provides 4.2 VDC power to charge the spare battery.
- Compatible with the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

**Charging Spare Batteries**

1. Connect the charger to a power source.
2. Insert the battery into the charger and gently press down on the battery to ensure proper contact.

The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the changer alternately enables and disables battery charging to keep the battery at acceptable temperatures. The charger indicates when charging is disabled due to abnormal temperatures via its LED.
USB Charge Cable

The USB Charge Cable:

- Provides 5 VDC power to charge the battery.
- Provides power and/or communication with the host computer over USB to the device.
- Compatible with devices using the following batteries:
  - MC3300R 5200 mAh PowerPrecision+ extended battery.
  - MC32N0 5200 mAh PowerPrecision extended battery.

The USB Charge Cable snaps onto the bottom of the MC3300R and removes easily when not in use. When attached to the MC3300R allows charging only.

Connecting the USB Charge Cable to Device

**NOTE:** To function properly, remove the lower part of the rubber boot or the entire rubber boot before placing in a charging cradle.

To connect the USB Charge Cable to the device, insert the USB Charge Cable straight onto the device until the device touches the bottom of the cable cup.
Figure 19  Connecting the USB Charge Cable

Connecting the USB Charge Cable to Host Computer

To connect the USB Charge Cable to a host computer:

1. Connect the USB Charge Cable to the MC3300R.
2. Connect the USB connector of the cable to a host computer.

Figure 20  Connecting USB Charge Cable to Host Computer
Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device.

NOTE: Charging using a host computer USB port could take longer.

To achieve the best charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the in sleep mode.

Charging the Device

To charge the device using the USB Charge Cable:

1. Connect the USB Charge Cable to the MC3300R.
2. Connect the USB connector of the power supply.
3. Plug the power supply into a power outlet.

Figure 21  Charging the Device

Main Battery Charging

The device’s Charging/Notification LED indicates the status of the battery charging in the device.

NOTE: In many cases the 90% charge provides plenty of charge for daily use.

To achieve the best charging results use only Zebra charging accessories and batteries. Charge batteries at room temperature with the MC3300R in sleep mode.

The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 6 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 6 hours at room temperature.
Disconnecting the USB Charge Cable

To disconnect the USB Charge Cable from the MC3300R:

1. Grasp the cable cup in one hand (by pinching the front and back) and the device in the other hand.
2. Remove the device by pulling straight up.

**Figure 22**  Disconnecting the USB Charge Cable
MC33XX Charge Only Adapter

Use the MC33XX Charge Only Adapter for backwards compatibility with the MC32N0 cradles and the MC3300R mobile computer.

- MC33XX Charge Only Adapter supports the MC32N0 1-Slot USB Cradle, MC32N0 4-Slot Charge Only Cradle, and MC32N0 4-Slot Ethernet Cradle.
- MC33XX Charge Only Adapter provides charge only; no communication when used with the MC32N0 cradles.
- MC32N0 1-Slot USB Cradle provides 5.4V DC to charge the device.
- MC32N0 1-Slot USB Cradle (with the MC33XX Charge Only Adapter) is compatible with an MC3300R mobile computer charging either an MC3300R PowerPrecision+ extended battery or an MC32N0 PowerPrecision extended battery, but the MC32N0 1-Slot USB Cradle spare battery slot is only compatible with the MC32N0 PowerPrecision batteries.

Adapter Installation

To install the MC33XX Charge Only Adapter into the MC32N0 Cradle:

1. Clean the MC32N0 cradle and contacts with an alcohol wipe, using a back and forth motion with your finger. For more information about cleaning, see Troubleshooting.

   Figure 23  Clean MC32N0 Cradle

2. Peel and remove the adhesive from the back of the adapter.

   Figure 24  Peel and Remove Adhesive
3. Insert the adapter into the MC32N0 cradle and adhere to the bottom of the cradle.

**Figure 25** Insert Adapter into Cradle and Adhere

4. Insert the MC3300R device into the MC32N0 cradle.

**Figure 26** Insert MC3300R device into MC32N0 Cradle

The MC3300R 5200 mAh PowerPrecision+ extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.

The MC32N0 5200 mAh PowerPrecision extended battery charges from 0% to 90% in less than 5.5 hours at room temperature.
Charging Temperature

Charge batteries in temperatures from 0 °C to 40 °C (32 °F to 104 °F). Charging is intelligently controlled by the MC3300R.

To accomplish this, for small periods of time, the MC3300R or cradle alternately enables and disables battery charging to keep the battery at acceptable temperatures. The MC3300R or cradle indicates when charging is disabled due to abnormal temperatures via its LED.
MC3300R Rubber Boot

The rubber boot provides additional protection for the MC3300R.

**NOTE:** To function properly, remove the lower part of the rubber boot or the entire rubber boot before placing in a charging cradle.

If the hand strap is attached, release the hand strap to install the rubber boot. After the rubber boot is installed, reattach the hand strap.

To attach the rubber boot:

1. If the hand strap is attached, remove the hand strap.
2. Slide the battery end of the MC3300R into the bottom of the rubber boot.

**Figure 27** Slide MC3300R into Bottom of Rubber Boot

3. Grasp the top of the rubber boot and place over the top of the MC3300R.
4. Re-attach the hand strap (see Hand Strap on page 55).

**Figure 28** Place Rubber Boot Over Top of MC3300R
Fabric Holster

The Fabric Holster provides a soft holder for the mobile computer. It consists of a fabric mobile computer holder, a detachable shoulder strap and a belt strap. See figures below to attach the Fabric Holster to a belt and shoulder strap.

Belt Strap

Attach the Fabric Holster to a belt or waist band.

Figure 29  Attach the Fabric Holster to a Belt

Shoulder Strap

Attach the fabric holster to a shoulder strap.
Using the Belt Strap

The Fabric Holster holds the MC3300R on a belt or waist band.

1. Secure the Belt Strap over the belt or waistband and snap into place.
2. To insert the MC3300R, slide the mobile computer (battery end first) into the Fabric Holster with the screen facing the user.

Figure 32  Insert MC3300R

3. Secure the MC3300R with the restraining strap and place over the MC3300R to secure in place.

Figure 33  Secure with Strap

4. To remove the MC3300R, unsnap the restraining strap to release. Lift the MC3300R out of Fabric Holster.

Using the Shoulder Strap

1. Connect the clips on the shoulder strap to the rings on the fabric holster.
2. Place the shoulder strap over your head and rest on your shoulder.
3. Lift the strap and insert the MC3300R into the holster.
4. Secure the strap to hold the MC3300R in place.
Hand Strap

To install the hand strap:

1. Thread the lanyard loop through the opening near the base of the trigger handle.

**Figure 35**  Insert Loop Through Handle Slot

2. Insert the top end of the hand strap through the loop.

**Figure 36**  Thread Hand Strap Through Loop

3. Thread the hand strap through the lanyard.
4. Pull the hand strap through the loop.
5. Thread the end of the hand strap with the tab through the slot on the bottom of the MC3300R.
Figure 37  Thread Tab Through Slot

6. Slide the tab through the slit in the hand strap so that the tip of the tab is facing away from the MC3300R.
The upgraded Zebra RFID Mobile Application is now called the 123RFID Mobile Application. For detailed information about this app refer to the 123RFID Mobile Application User Guide, p/n MN-003765-xx. This guide describes the app for Android and demonstrates the device’s capability and tag operation functionality.

The guide is available at: zebra.com/support.
RFID Manager

Introduction

The Zebra RFID Manager application allows the user to perform various management functions on the RFID reader module in the MC3300R device including firmware update, power control for the RFID Radio, resetting the RFID module to factory defaults, and various other functions.

NOTE: Some screens shown in this guide may differ from the actual screens shown on the device. Screens are subject to change with future releases.

Using the RFID Manager for Android

To use this application for RFID operations:

1. Launch the RFID Manager application for Android on the mobile device.
2. During initial use, set the region in which the device is operating. To set the region, open the application and select Settings > Regulatory.

NOTE: If the RFID Demo application or partner application is connected to the MC3300R, the RFID Manager can still perform all management functions, however care should be used as to not interfere with any ongoing operational behavior of the device (e.g., inventory, setting parameters, etc.).

Connection Status

Reader Status

By default, the RFID Reader is powered on and in the Ready. If the MC3300R RFID Radio is not powered on, the Reader Status displays Off.
Figure 38  Reader Connection Status Screens

RFID Manager

**Connection Status**
- Reader: READY
- Client Application: CONNECTED

**Battery Status**
- Charging Level: 89%
- Charging Status: Charging

**Regulatory**
- USA

**Notification**
- Warning: None

---

RFID Manager

**Connection Status**
- Reader: OFF
- Client Application: DISCONNECTED

**Battery Status**
- Charging Level: 96%
- Charging Status: Charging

**Regulatory**
- No Region Selected

**Notification**
- Warning: None
**Client Application Status**

If the MC3300R RFID Reader Status is **Ready**:

1. Launch the application manually.
2. On the **Home** Screen under **Connection Status > Client Application**, it indicates if the client application is **Connected** or **Disconnected** to the MC3300R RFID Reader.

![Client Application Status Screens](image)

The **Battery Status** contains the battery **Charging Level** percentage and the **Charging Status** (Charging or Discharging).
RFID Manager

RFID Regulatory

To set the region, select the Regulatory arrow button to open the Regulatory screen. Select the Region and Channel Selection settings and tap the Apply button. The Region drop-down displays the current region to which the device is set. Choose the correct region before using the device.

**NOTE:** The Region and Channel Selection requires setup before the initial use only. However, if a Reset to Factory Defaults operation is conducted on the MC3300R RFID Reader, the operation removes the Region and Channel and needs to be set again.

**NOTE:** Select only the country in which you are using the device.

- **Channel Selection** is allowed only for the regions that allow channel setting.
- Supported regions are those reported by the specific MC3300R Model.
- If the region is not configured on the MC3300R, the Regulatory status shows as NA.
- A customer application can also set the region and configuration programmatically.

**Figure 40** Regulatory Screens

![RFID Manager Screenshots]

Warning: Select only the country in which you are using the device.

Settings Applied Successfully.
**Settings**

To display Settings, select the **Settings** icon located on the bottom tool bar.

Turn on the **Settings** slider switch control to enable control of setting options.

Setting options are as follows:

- **Temperature Notification** – If enabled, a temperature high and critical notification appears with temperature level indications.
- **Reader Power Off/On** - If enabled, the MC3300R RFID Radio is powered on. When the MC3300R RFID radio is powered off, no RFID operations are supported.
• **Reset to Factory Defaults** - Select **Reset to Factory Defaults** to reset all configuration and region settings to factory default settings. When selected, the RFID reader internally reboots and a window message displays after successful operation.

**Figure 42**  Reset to Factory Defaults Screen

![Reset to Factory Defaults Screen](image)

• **Reset Reader** - Select **Reset Reader** to perform a reader restart. When selected, the reader reboots and a window message displays after successful operation. Reader status confirmation is located under **Home > Status**.

**Figure 43**  Reader Reset Screen

![Reader Reset Screen](image)
Firmware Update

A product code update, bootloader, and radio update may be performed using the firmware update screen.

NOTE: More than 15% battery level is required to perform a Firmware Update.

To perform a firmware update:

1. Copy the RFD file into the MC3300R SD card. One method is through the abd command (abd push <firmware>/sdcard).

NOTE: The MC3300R must have USB Debugging enabled in Developer Options for adb commands to work properly.

2. Browse for the firmware RFD file, by clicking on the folder icon.

NOTE:

3. Select the required RFD file, from File View menu. When the file is selected, the application returns to update screen.

Figure 44  Transferring Files for Firmware Update
4. Click on the **Update** button.

**Figure 45**  RFID Manage Firmware Update Screen

5. Once Update is initiated, a status box displays that the firmware updates is in progress. For more information on the current status of the Firmware update (including a progress bar), refer to the Android Notification bar.

6. After a successful update, a window displays a MC3300R Firmware Installation Complete message.

**Figure 46**  Firmware Update Progress Window
The updated firmware information is displayed on the Information screen.

Figure 47  Information Screen

Recovery Mode

Only select the **Recovery Mode** check box (see Figure 45 on page 65) if the MC3300R firmware is suspected to be corrupted. Contact the Zebra support team to use the Recovery Mode option.
RFID Manager Log

The following options may be enabled to capture reader logs.

- **Real-time Logs** - Captures real time logs from the MC3300R RFID radio.
- **Retrieve Buffered Logs** - Captures the buffered logs from the MC3300R RFID radio.
- **Debug Logs** - Captures RFID System Service debug logs.

NOTE: All three logs can be enabled. If all three logs are disabled, default logs from the application is captured which does not include MC3300R RFID System Service logs.

Figure 48  RFID Manager Logger Screen

To capture real time logs:

1. Enable **Real-time logs**.
2. Connect and use the RFID application to create logs.
3. Tap on **Export** to retrieve the real time logs. It is not required to disconnect or exit the RFID application.

The Retrieve Buffered Logs option can only be used if the RFID application is not actively reading or writing RFID tags.

The standard RX Logger application can also be used to get RFIDAPI3 and RFIDSERVICE activity.

**Exporting Log Files**

To export captured log files, select the **Export** button. The log file is saved as RfidLog.txt at a root of the MC3300R sdcard file system. Retrieve the log file after connecting with PC through adb. RfidLog.txt file is located in the internal storage of the root folder.
Introduction

This chapter provides instruction necessary to generate a RFID Firmware update profile and import RFID CSP plug-in into the StageNow application.

Creating Firmware Update Profile using StageNow

The following provides an example for creating a profile to copy SAADXS00-001-N13.rfd from the staging server to the device and then subsequently updating the firmware.

To create a new update firmware profile:

1. Ensure both the device to be staged and the staging server are connected and accessible through the network.
2. Select Create New Profile from the side menu.

Figure 49  Create Firmware Update - CSP Library Screen
3. Select XpertMode and tap on Create from the Select a Wizard window.

**Figure 50** Wizard Window Selection

4. Enter a new profile name (For example, Rfid-N13-update as shown in Figure 90) and tap on Start.

**Figure 51** Create Firmware Update - Profile Name
5. Click on **Add** to add the **FileMgr CSP** and **rfidmanager CSP**.

**Figure 52**  Create Firmware Update - Add Applications

![Image](image1.png)

6. Enter the **Target Path** (target path in the device) and the **Source File URL** (select the file path in the stagingserver) as shown in **Figure 92** and tap **Continue**.

**Figure 53**  Create Firmware Update - FileMgr Configurations

![Image](image2.png)
7. Select the **UpdateFirmware** action under RFID action list and enter the Target Path and File Name entered previously (/data/tmp/public/SAADXS00-001-N13D0.rfd) and tap **Continue**.

**Figure 54** Create Firmware Update - RfidManager Configuration

8. Review your input and tap on **Complete** Profile.

9. Select the **Barcode Type** check box required and click on **Test**.

**Figure 55** Create Firmware Update - Barcode selection
10. The test generates a barcode which can be scanned using the StageNow client on the device to stage the firmware.

**Figure 56** Stage Firmware Barcode
Introduction

This chapter provides instruction necessary to generate a RFID Firmware update profile and import RFID CSP plug-in into the StageNow application.

Creating Firmware Update Profile using StageNow

In the following provides an example for creating a profile to copy SAADXS00-001-N10D0.DAT from the staging server to the device and then subsequently updating the firmware.

To create a new update firmware profile:

1. Ensure both the device to be staged and the staging server are connected and accessible through the network.

   **Figure 57**   Create Firmware Update-CSP Library Screen

2. Select Create New Profile from the side menu.
3. Select XpertMode and tap on Create from the Select a Wizard window.
Figure 58  Wizard Window Selection
4. Enter a new profile name (For example, Rfid-N10-update as shown in Figure 59) and tap on **Start**.

**Figure 59** Create Firmware Update-Profile Name

5. Click on **Add** to add the **FileMgr CSP** and **rfidmanager CSP**.

**Figure 60** Create Firmware Update-Add Applications
6. Enter the **Target Path** (target path in the device) and the **Source file URL** (select file path in the staging server) as shown in Figure 61 and click Continue.

**Figure 61** Create Firmware Update-FileMgr Configuration
7. Select the **Firmware Update** check-box and enter the **Target Path** and **File Name** entered previously (/data/tmp/public/SAADXS00-001-N10D0.DAT) and tap **Continue**.

**Figure 62** Create Firmware Update-RfidManager Configuration
8. Review your input and tap on **Complete** Profile.
9. Select the **Barcode Type** check box required and click on **Test**.

**Figure 63**  Create Firmware Update-Barcode selection
10. Test generates a barcode which can be scanned using the StageNow client on the device to stage the firmware.

**Figure 64** Stage Firmware Barcode
Troubleshooting

Introduction

This chapter provides troubleshooting solutions for potential problems. For more detailed device and accessory troubleshooting, refer to the MC33XX Mobile Computer Integrator Guide at: www.zebra.com/support.

Troubleshooting the MC3300R

</table>
### Specifications

#### Network Connections
- USB 2.0 High Speed (host and client), WLAN and Bluetooth

#### Notification
- Side LEDs and audible tone.

#### Keypad Options
- 29-key Numeric
- 38-key Function Numeric (calculator-style integrated numeric keypad)
- 47-key Alpha-Numeric (calculator-style integrated numeric keypad)

#### Voice
- PTT Voice Support (Internal Speaker)

#### Audio
- Speaker

### Performance Characteristics

#### CPU
- Qualcomm 8056 1.8 GHz hexa-core 64-bit with power optimization

#### Operating System
- Android 8.1 Oreo

#### Memory
- 4 GB RAM/32 GB Flash.

#### Output Power (USB)
- USB: 5 VDC @ 500 mA max.

### User Environment

#### Operating Temperature
- -20°C to 50°C (-4°F to 122°F)

#### Storage Temperature
- -40°C to 70°C (-40°F to 158°F) without battery

#### Charging Temperature
- 0°C to 40°C (32°F to 104°F)

#### Humidity
- 5% to 95% RH non-condensing

#### Drop Specification
- Multiple 1.5 m (5 ft.) drops to concrete over the entire operating temperature range.

#### Tumble Specification
- 1,000 1.6 ft./0.5 m tumbles (hits)

#### Sealing
- IP54

#### Vibration
- 5 Hz to 2 KHz

#### Thermal Shock
- -40°C to 70°C (-40°F to 158°F)

#### Electrostatic Discharge (ESD)
- ±20 kVdc air discharge, ± 10 kVdc contact discharge

### Wireless LAN Data Communications

#### Wireless Local Area Network (WLAN) radio
- IEEE® 802.11a/b/g/n/ac/d/h/i/k/r/w

#### Data Rates Supported
- 2.4 GHz: 144 Mbps
- 5 GHz: 867 Mbps

#### Operating Channels
- Chan 36 - 165 (5 GHz), Chan 1 - 13 (2.4 GHz); actual operating channels/frequencies depend on regulatory rules and certification agency.
### Specifications

#### Security and Encryption
- **Security Modes:** WPA and WPA2 (Personal or Enterprise)
- **Encryption:** WEP40/WEP104, TKIP and AES
- **Authentication:** EAP-TLS; EAP-TTLS (MSCHAP, MSCHAPv2, PAP); PEAP (MSCHAPv2, EAP-GTC); LEAP
- **Other:** Wi-Fi certified, and supports IPv6

#### Certifications
- 802.11n/ac, WMM-PS, WMM-AC, PMF, Voice Enterprise, Wi-Fi Direct, WPS

#### Fast Roam
- PMKID/OKC/CCKM/802.11r

#### Wireless PAN Data
- **Bluetooth:** V4.1, V2.1 + EDR w/ Bluetooth Low Energy (BLE). Class 2

#### Data Capture
- **Scanning:** SE4750-SR 2D, SE4750-MR 2D, SE4850-ER

#### 2D Imager Engine (SE4750) Specifications
