31) Refit the right hand retaining screw to the switch panel unit as shown.

For more information, contact your local Motion Reseller or Motion Representative.
Chevy Tahoe Installation Instructions

32) The vehicle should now look like the below photograph and is ready to have the trim panel refitted. Note that it may be necessary to bend out the two metal tabs indicated slightly to make fitting of the trim panel easier.
Chevy Tahoe Installation Instructions

33) Once the trim panel is securely back in place, fit the Front Bracket 032-02-0299 as shown. Use four screws TD503712 and four lock washers TD503481 in the positions shown and tighten securely.
34) Fit the Docking Station / Tilt & Rotate Assembly to the front bracket as shown using the provided M8 fasteners.  
**NOTE:** It may be necessary to temporarily remove the rubber edge strip to allow for correct fitment. 
Ensure that the location lugs are correctly engaged before final tightening to prevent unwanted rotation.
