

# ET5X Power Pack Regulatory Guide

## Regulatory Information

This device is approved under Zebra Technologies Corporation.

This guide applies to model number: BTRY-ET5X-PRPK2.

All Zebra devices are designed to be compliant with the rules and regulations in the locations they are sold and will be labeled as required.

Local language translations are available at the following website: [www.zebra.com/support](http://www.zebra.com/support).

Any changes or modifications to Zebra equipment not expressly approved by Zebra could void the user's authority to operate the equipment.

Declared maximum operating temperature: 50°C.

For use only with Zebra approved and UL Listed mobile computers, Zebra approved, and UL Listed/Recognized battery packs.

## Charging

This device can be charged indirectly via Zebra ET5X tablet accessories powered by a suitable external power supply (EPS).

Use ONLY the Zebra approved UL LISTED ITE power supply specified in the device User Guide. Use of alternative power supply will invalidate any approvals given to this unit and may be dangerous.

## Power Packs

### Taiwan - Recycling

「廢電池請回收」

EPA (Environmental Protection Administration) requires dry battery producing or importing firms in accordance with Article 15 of the Waste Disposal Act are

required to indicate the recycling marks on the batteries used in sales, giveaway, or promotion. Contact a qualified Taiwanese recycler for proper battery disposal.

### Power Pack Information

**WARNING!** Power pack contains non-removable, rechargeable batteries. Do not disassemble, short circuit, or dispose of in fire.

**CAUTION** Dispose of power pack according to instructions.

Zebra approved rechargeable power packs are designed and constructed to the highest standards within the industry.

However, there are limitations as to how long a power pack can operate or be stored before needing replacement. Many factors affect the actual life cycle of a power pack such as heat, cold, harsh environmental conditions, and severe drops.

When power packs are stored over six months, some irreversible deterioration in overall power pack quality

may occur. Store power packs at half of full charge in a dry, cool place, removed from the equipment to prevent loss of capacity, rusting of metallic parts, and electrolyte leakage. When storing power packs for one year or longer, the charge level should be verified at least once a year and charged to half of full charge.

Replace the power pack when a significant loss of run time is detected.

Standard warranty period for all Zebra power packs is one year, regardless if the power pack was purchased separately or included as part of the mobile computer or bar code scanner. For more information on Zebra power packs, please visit: [www.zebra.com/batterybasics](http://www.zebra.com/batterybasics).

### Power Pack Safety Guidelines

The area in which the units are charged should be clear of debris and combustible materials or chemicals. Particular care should be taken where the device is charged in a non-commercial environment.

- Follow power pack usage, storage, and charging guidelines found in the user's guide.
- Improper power pack use may result in a fire, explosion, or other hazard.
- To charge the power pack, the power pack and charger temperatures must be between +32 °F and +104 °F (0 °C and +40 °C).
- Do not use incompatible power packs and chargers. Use of an incompatible power pack or charger may present a risk of fire, explosion, leakage, or other hazard. If you have any questions about the compatibility of a power pack or a charger, contact Zebra support.

- Do not disassemble or open, crush, bend or deform, puncture, or shred.
- Severe impact from dropping any power pack-operated device on a hard surface could cause the power pack to overheat.
- Do not short circuit a power pack or allow metallic or conductive objects to contact the power pack terminals.
- Do not modify or remanufacture, attempt to insert foreign objects into the power pack, immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.
- Do not leave or store the equipment in or near areas that might get very hot, such as in a parked vehicle or near a radiator or other heat source. Do not place power pack into a microwave oven or dryer.
- Power pack usage by children should be supervised.
- Please follow local regulations to promptly dispose of used re-chargeable power packs.
- Do not dispose of power packs in fire.
- In the event of a power pack leak, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with large amounts of water and seek medical advice.
- If you suspect damage to your equipment or power pack, contact Zebra support to arrange for inspection.

## Radio Frequency Interference Requirements - FCC

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC

rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.
