Introduction

This release notes are for the Zebra RFID Mobile Application for Android V1.2.3.26

Description

The Zebra RFID Mobile application demonstrates the performance, functionality and versatility of the RFD8500 over Bluetooth Serial Port Profile. It is also an application that can be used as reference to develop new application or to port existing ones to use directly the powerful ZETI (Zebra Easy Text Interface). The text interface provides the flexibility to write once and re-use code on any platform.

Updates over 1.0.2.17

1. Application built with unified SDK v2.0.0.2 release
2. Application renamed 'Zebra_RFD8500_Mobile'

Updates over 1.0.2.16

- Fixed issue with duplicate region list being shown on auto reconnect

Known Issues

1. Application may fail to retrieve batched tags and update reader information incase of following scenario; Reader is in auto batch mode and disconnection happens with Application while inventory is going on. Application tries to auto reconnect and notifies of batch mode running. Once user stops the inventory operation application may show the issue as mentioned.

Zebra RFID Mobile Application for Android

Workaround: Application has to wait for completion of 'stop' API before doing reader information update after auto reconnect

Device Compatibility

- RFD8500
- RFD8500i

Release Notes

- Zebra_RFID_Mobile_API Version 1.2.3.26

Components

The zip file contains the following components:

- Zebra RFID Mobile Application APK file and source code
- Android Studio project
