Zebra RFID Mobile Application for Android

Release Notes for V1.0.2.16

Contents

Introduction

This release notes are for the Zebra RFID Mobile Application for Android V1.0.2.16

Description

The Zebra RFID Mobile application demonstrates the performance, functionality and versatility of the RFD8500 over Bluetooth Serial Port Profile. It is also an application that can be used as reference to develop new application or to port existing ones to use directly the powerful ZETI (Zebra Easy Text Interface). The text interface provides the flexibility to write once and re-use code on any platform.

Updates over 1.0.0.59

1. Support for 120000 unique tag count
2. Android API level 19 & 20 support
3. Support for NFC based pairing and connection with RFD8500i
4. Support for configuring and reporting Unique tag from RFD8500
5. Tag match mode support to allow identification of expected tag inventory

Device Compatibility

- RFD8500
- RFD8500i

Zebra RFID SDK for Android

Release Notes

- Zebra_RFID_Mobile_API Version 1.0.2.16

Components

The zip file contains the following components:
