Introduction

This release notes are for the Zebra RFID Mobile Application for Android v1.0.5.21

Description

The Zebra RFID Mobile application demonstrates the performance, functionality and versatility of the RFD2000

Functionality:

1. Inventory – A quick snapshot of the scanned RFID tags and the ability to search a tag from the list.
2. Rapid Read – A simple screen to quickly get unique and total tag counts.
3. Locate Tag - Use the Locate Tag feature to find and locate an item by searching for a specific Tag ID. The device will provide feedback that indicates the relative distance to the tagged item.
4. Filter – Select/deselect a tag based on pattern criteria.
5. Access - manipulate standard tag memory locations.
6. Settings – Configure the reader to meet your needs.
 - a. Configure the RFID Antenna power and link profile.
 - b. Time the Start/Stop Trigger
 - c. Control the audible beep volume
 - d. Configure reader to report only unique tags
7. Use the Power Management settings to optimize battery usage
8. Battery level notifications
9. Export RFID data to a PC

Zebra RFID Mobile Application for Android

Updates over 1.0.5.15
