# Release Notes Zebra RFID Host .NET SDK for Windows – FX Series Host programming

---

Introduction

Description

Contents

Device Compatibility

Installation Requirements

Part Number and Release Date

---

## Introduction

This package contains the RFID3 updates required to create host-based .NET applications for the FX Series RFID reader. This supports Visual Studio v2015 and Visual Studio v2017.

## Description

This package contains installer for RFID Host .NET SDK for Windows platform. The existing RFID APIs that were supported as part of the last official release EMDK for .NET v2.9 Update 1 are supported in this release. Also, the documentation had been made specific to RFID SDK and has been enhanced with more examples.

This release is aimed at supporting the VS 2015 and VS 2017 versions.

The version numbers of the DLLs are as listed in the Versions section.

## Contents

Zebra-RFID-FXSeries-Host-DotNet-SDK.msi

## Versions

RFID API3 PC DLL	5.5.2.7	RFIDAPI32PC.dll	24-Sep-2018
