Release Notes DialogBuilder 4.1.7

Contents

Description

Updates since last release:

Corrections

- SPR-32678 - TSP generator does not handle double-quoted empty string.
- SPR-33749 - SPA's Speech Agent is incorrectly updating data into column, when it should be leaving it empty.
- SPA Installer Zebra rebranding
- SPA ETL application can run from the command line.
- License check very slow on some systems.
- DialogBuilder Emulation project templates should use Background asynchronous messaging
- SPR-33179 - Unhandled exception when Entry Assignments left hand side is empty.
- SPR-32658 - TekSpeech Pro improved performance on table search when all column values use equivalence.
- DialogBuilder TSP generator has ability to generate application to communicate with multiple host systems.
- Foreground ODR Flush Ignores the host and port set in each ODR
- TekSpeech Pro: ignoring message "Host" and "Service" properties
- TekSpeech Pro allows host and port for synchronous (LUT) communication to be specified in application.

Improvements

- Provide configuration of 1D and 2D symbologies for RS507 scanner.
- Update SPA version to 3.3.

New Features

- Project Editor, double-click on Log entry, selects State
- TekSpeech Pro Support for MMS Table

Device Compatibility

This software release supports developing TekSpeech Pro applications to be executed on version 3 clients for the following devices.

Device	OS Version
WT4090	CE5
WT4090VOW	CE5
MC2180	CE6
MC9190	CE6
MC32N0	CE7
MC92N0	CE7
WT41N0	CE7
WT41N0VOW	CE7
MC92N0	WM
MC3190	WM
MC9190	WM

Component Contents

Component	Version
Product Build Number	4.1.7.6480
TekSpeech Connector (MIS)	3.6 SP6
Speech Process Analyzer	3.3

Installation Requirements

Required

- Windows 7, Windows 8.1, or Windows 10.
- NET Framework 3.5 SP1 (or later) including the latest security updates for .NET Framework 3.5.

Installation Instructions

Add complete installation instructions here, if required:

1. Copy the file to your workstation.
2. Launch the installation setup program.
3. If prompted by UAC (User Account Control) or SmartScreen, ensure to allow the installation setup program to make administrative changes to your workstation.

Downloadable Software Included in this Release

Filename	Description
DialogBuilder-4.1.7.6480.exe	**DialogBuilder installation setup.**
