Description

The TekSpeech Pro Device and Operator Manager (DOM) provides the management of device operators in the TekSpeech Pro system.

Updates since last release (TekSpeech Pro DOM version 1.3.12):

- Fixed issue operator password stored as encrypted value in database
- Fixed issue delete site not allowed unless all related data to that site is deleted first
- (SPR-30404) Fixed issue related to encoding of voice logs files
- Fixed issue related to moving operator to a different site and updating link to a speech profile
- New feature DOM health check
- (SPR-29873) Fixed issue operator login status consistency
