Installation and Configuration Instructions

Microsoft* .NET Framework 4.0 must be installed prior to installing the Motion QuikNav application.

[Click here to download the Microsoft .NET Framework 4](#)

To install QuickNav, perform the following steps:

1. Uninstall any previous version of QuickNav from Programs and Features.
2. Download the update and save to the directory location of your choice.
3. Unzip the file to a location on your local drive.
4. Double-click the installer executable (.msi file) and follow the prompts.
5. Double-click the .reg file to update your button access to QuickNav functions.

Licensing

Refer to your applicable end-user licensing agreement for usage terms.
