Replaces Version	4.21.11 ( c )
Intended Product	Motion Computing LE1700 PC's Only
Supported Operating System	<ul style="list-style-type: none"><li>Windows XP Tablet Edition 2005*, Version 2002, Service Pack 2</li></ul>

### Overview

Bluetooth is a wireless technology that enables the LE1700 tablet to wirelessly communicate in the 2.5 GHz ISM (license free) frequency band. It allows devices such as mobile phones, headsets, PDA's and portable computers and tablets like the LE1700 to communicate and send data to each other without the need for wires or cables to link to devices together. It has been specifically designed as a low cost, low power, radio technology, which is particularly suited to the short range Personal Area Network (PAN) application. (It is the design focus on low cost, low size and low power which distinguishes it from the IEEE 802.11 wireless LAN technology).

### What's New In This Release

- Added Support for Multi-language systems

### Known Issues and Limitations

- None

### Installation and Configuration Instructions

To install the **Bluetooth Stack for Windows by Toshiba** 5.10.06 ( c ) Update, do the following:

- Download "**LE1700 Bluetooth v5.10.06.zip**" to directory location of your choice

- Extract all files
- Navigate into the newly created directory
- Run Setup.exe and follow displayed instructions using the default settings. (choose 'Modify' option if prompted). This will modify your Dashboard installation, leaving any non-default Dashboard variables in place.
