

Motion Computing Motion Up-to-Date Software Release Notes

Name	Motion Up-to-Date
File Name	X5m_Win7_MUTD_Q2_2105.zip
Release Date	April 9, 2015
This Version	Q2-2015
Replaces Version	All previous versions
Intended Product	Motion Computing C5m and F5m Tablet PCs only
File Size	237 MB
Overview	Motion Up-to-Date is a quarterly package that aggregates all software sustaining releases for a specific platform in a single download bundle. The package includes separate Release Notes and installation procedures for each component included in the bundle. Motion Up-to-Date is intended to simplify software and image maintenance for end-users and IT personnel.

Fixes in this Release

- Please see individual Release Notes for a description of fixes contained in each individual component.

Installation and Configuration Instructions

Notes:

- Selecting on the download link for Win7 will download a ZIP file containing important Software updates released during this update period. Extract files and install as directed in individual Release Notes for each component.
- This update package does not include updates for WWAN cards. See Motion web site for latest drivers and connection managers.

Components included in this release:

1. BIOS, A01
2. Intel Graphics, 10.18.14.4170
3. Intel Wireless LAN, 17.16.0

Licensing

Refer to your applicable end-user licensing agreement for usage terms.
