
Release Notes HS3100, FW Version 3.8

Description

These release notes describe the release of the HS3100 Rugged Bluetooth Headset Updated Firmware.

The following are the changes into the new FW:

- Updated power management routine
- Merged handling of microphone gain control from WinCE devices

Device Compatibility

This FW is compatible with HS3100 Rugged BT Headset and can be installed on any headset with a manufactured date no earlier than September 2016.

Component Contents

Component	Version
HS3100 Firmware	HS3100-v038_noCVC_0117.dfu

Installation Requirements

Installation of a new FW on the HS3100 headset is done via USB service port using the USB cable CBL-HS3100-CUC1-01 and the DFU utility, see Device Firmware Upgrade Utility, which is installed on a Windows-based PC.
