Release Notes - <ET1N2 Jelly Bean WWAN Rev A1 - 01.20.2345>

Introduction

The ET1 Enterprise Tablet doesn't compromise what you rely on most, like security, durability and flexibility. It's designed with one purpose in mind – to make your enterprise ready for whatever the future holds and whatever your customers demand. It's an uncompromising approach to mobile computing, and it's the only tablet that's flat-out enterprise.

Designed to meet your needs and built to last, the ET1 comes packed with features that will help you improve performance from the sales floor to the stockroom and beyond, access information faster, engage customers and work smarter than ever before. The ET1 will run all the applications required to help your workforce accomplish every task, every day.

Android Jelly Bean OS (4.1.1) offers several significant improvements over the Gingerbread OS (2.3), with user benefits that include:

- Enhanced performance & faster processing – e.g., An application running on the ET1 w/JB will typically execute faster than identical app running on the ET1 w/GB
- Improved user interface
- Smoother UI, Video & Animations
- Device encryption
- 'Strong' password support (history, expiration, and complexity)
- Proxy support
- VPN support
- USB Host Support
- Exchange Active Sync v14.1

Recovery update package 01.20.2345 contains the software required to update an ET1N2 device to the Jelly Bean RevA1 software
Please see installation instructions.

This software is intended to be loaded and run on the ET1N2 devices. It is important that care be taken to match the device configuration with the appropriate Recovery update package. If an incorrect Recovery update package is loaded, the device may not boot.
