Introduction

From the sales floor to the backroom, the Motorola MC2100 mobile computer has what it takes to affordably automate the capture of inventory data right at the point of work. Leveraging Motorola's Mobility Platform Architecture 2.0, the MC2100 offers plenty of processing power, industry-leading data capture capabilities rugged design, superior ergonomics, flexible data capture options, plus centralized management. And support for Motorola's RhoElements application development platform allows you to create cross-platform applications that work on different mobile computers with different operating systems. MC2100 is available in Wireless LAN (802.11b/g/n) and Batch configuration.

Description

Windows CE 6.0 Core OS (v06.00.0000 R3 built on August 2011 QFE baseline)

MSP Agent v7.06.19
RD Client v7.06.19
DataWedge v3.4.01 (UI build 33049)
Wavelink TelnetCE client v7.3.63 (Demo mode - WLAN configuration only)
Power Micro v55.64.0001
CPLD v1.00

Contents

1. 2100c60AenUP013417.zip - OS Update Package v01.34.17 Software (English)
2. 2100c60AenAB013417.APF - MSP OS Update Package v01.34.17 Software (English)
3. 2100c60AenOS013417.hex - OS hex Image v01.34.17 Software (English)

Device Compatibility

This software release has been approved for use with the following Motorola devices.

Device	Operating System
MC2100	Windows CE 6.0 Core
MC2180	Windows CE 6.0 Core

Installation Requirements

MC2100 device must contain a released version of CE 6.0 Software.

Installation Instructions

Update through \Storage Card

- Unzip **2100c60AenUP013417.zip** file and copy its contents (**OSUpdate** folder) to the root folder on SD card.
- Insert the SD card in the device to be updated.
- Place the device to be updated on A/C power supply.
- Run **2100c60Aen_SD** shortcut from **\Storage Card\OSUpdate** folder to start the update process.

Update through \Application

- Unzip **2100c60AenUP013417.zip** file and copy its content (**OSUpdate** folder) to the **\Application** folder.
- Place the device to be updated on A/C power supply.
- Run **2100c60Aen_App** shortcut from **\Application\OSUpdate** folder to start the update process.

Notes:

- Keep the device in AC Power during the update process.
- Updating through Temp folder is not supported in MC2100 due to RAM space constraints.
- While using Application partition update method, Application data will be kept intact and OSUpdate folder will also remain after completing the OS Update process.
