Release Notes –" SPR24621-After installing the SMSC cab file, Active Sync stops working "

Introduction

This patch resolves following issue: For MC91xx devices with SMSC cab installed on cold boot/clean boot stops active sync connection.

Description

1. After installing updated SMSC driver from Support Central for MC9190 WM/CE OS, Active Sync would stop working after a CleanBoot(WM)/Warmboot(WM/CE) / Coldboot(CE).
2. If an application or the user cleans up '\Application' folder, this .cab solution has to be re-installed.

   Contents

   SPR24621_MC91xx_ ActivesyncIssue_NoReboot.cab
   SPR24621_MC91xx_ ActivesyncIssue_WithReboot.cab

Device Compatibility

This software release has been approved for use with the following Symbol devices,

Device	Operating System
