\*\*\*_woBoot.CAB: Copy the file to the device and double click on it. Confirm for all overwrite suggestions. Cold boot the device manually after the installation completed.

## Part Number and Release Date

July 8, 2013

## Notes:

To have the Fuction lock enabled the following registry should be applied:
[HKEY_LOCAL_MACHINE\Hardware\DEVICEMAP\KEYBD]
"FuncLockState"=dword:00000000

The patch has known issue for CE6.0: when Function locked, Shift locked icon displayed as well. The issue is cosmetical only, the device works according to Function lock rules.
