## **Description**

Thank you for selecting as your mobility solution tool provider.

This hotfix fixes the issue that intermittently MT2070 scanner loses insertion beep after being inserted into STB2078 cradle. It also fixes the issue that in some rare scenarios the scanner stops communicating with STB2078 cradle after the insertion.

---

## Installation

The following is the procedure to apply the Hotfix. It is assumed that the ActiveSync is installed on the PC.

- (1) Unzip the “MT2070.00.25.29\_OSUpdate.zip” to a directory on a PC;
- (2) ActiveSync the scanner to the PC. Make sure the battery is fully charged before running the update;
- (3) Run the “ActiveSyncOSUpdateMT2070.bat” within the directory. The updating will start automatically. Please do not remove the power to the scanner during the update. After a successful update, the scanner will reboot itself;
- (4) Warm boot the scanner (by press and hold scan trigger and ‘2’ key. Wait for screen going black the 1st time and release the trigger and key.). Verify the OS version is “00.25.29”.
