Introduction

TC55 is a ruggedized device based on Android for the enterprise market that blends the capabilities of a smart phone with those of a traditional enterprise PDA.

TC55 has a number of enterprise-grade features, including a touch-screen that can be used with gloves, support for stylus input for signatures, barcode capture capability and IP67 rating for dust and water protection.

It also features Zebra Extensions (MX) to make the Android operating system more enterprise ready, with security enhancements and hooks for device management tools, and is designed for a longer lifecycle than the typical smart phone.

TC55 is designed in response to customer feedback from using consumer-grade smart phones in the workplace, especially with the bring-your-own-device (BYOD) trend, where employees use their own choice of device for work.

With TC55 the workers can capture practically any type of data — from bar codes and signatures to photos, videos and NFC — improving on the job efficiency and customer service. The screen is optimized for Enterprise viewing, helping ensure the battery lasts a full shift.

And with a drop, tumble and environmental sealing specification you can count on, it has the durability required to serve your field workers for years.

This SW release contains TC55 Android KitKat Rebranded SW version offering new advanced features, increasing operation performance for the customer satisfaction.

Description

1. Android KitKat 4.4.3
2. Kernel 3.4.0
3. DataWedge v 3.1.29
4. Scanning Framework v5.46.1
5. MX.v4.4.4
6. WLAN FUSION_QA_1.02.0.0.028
7. RIL 1.0.10
8. Modem 20015326.48
9. MSP v07.08.85
10. SOTI client v12.1.0 Build 23469
11. StageNow v 2.1.1.1425
12. SimulScan v1.11.1
