1 Introduction

This is rebranded version. The Only difference from the previous release is rebranded components. No change to behavior and functionality.

TC55CH is a ruggedized device based on Android for the enterprise market that blends the capabilities of a smart phone with those of a traditional enterprise PDA. TC55CH has a number of enterprise-grade features, including a touch-screen that can be used with gloves, support for stylus input for signatures, barcode capture capability and IP67 rating for dust and water protection.

It also features Extensions (MX) to make the Android operating system more enterprise ready, with security enhancements and hooks for device management tools, and is designed for a longer lifecycle than the typical smart phone.

TC55CH is designed in response to customer feedback from using consumer-grade smart phones in the workplace, especially with the bring-your-own-device (BYOD) trend, where employees use their own choice of device for work.

With TC55CH the workers can capture practically any type of data — from bar codes and signatures to photos, videos and NFC — improving on the job efficiency and customer service. The screen is optimized for Enterprise viewing, helping ensure the battery lasts a full shift.

And with a drop, tumble and environmental sealing specification you can count on, it has the durability required to serve your field workers for years.

The TC55CH is only supported on the Verizon network in the USA. It will work on LTE, EVDO, and 1xRTT. This is a Data Only product and has no voice call capability.

2 Enterprise Mode

TC55CH standard configuration (GMS build) is by default (out of box) configured as:

- 100% Google CTS requirement compliant
- Enterprise Mode disabled

It is required to apply EnterpriseEnabler package to access full MSI enterprise features!

3 **Description**

1. JellyBean 4.1.2
2. Kernel v3.4.0
3. DataWedge v2.2.9
4. Scanning Framework 1.19.P03
5. MSP v7.08.67
6. MX 3.2.2-6
7. WiFi/BT FW M8960AAAAANAZW1040010
8. RIL 1.0.111
9. Modem PI-20015107.31

4 **Contents**

5 **OS Packages**

1. T55N1JEXCPUEN10701.zip– TC55CH OS Recovery Update package

6 Device Compatibility

This software release has been approved for use with the following devices.

| Device P/N | Operating System |
|---------------|------------------|
| TC55CH-G011EE | JellyBean4.1.2 |
| TC55CH-G011ES | JellyBean4.1.2 |
| TC55CH-GC11EE | JellyBean4.1.2 |
| TC55CH-GC11ES | JellyBean4.1.2 |

7 Installation Requirements

- This SW is intended for the TC55CH device

8 Installation Instructions
