Installation Instructions

CFE software update procedure

The installation instructions assume you have ADB installed on your PC (the adb drivers etc..) and your device has developer options enabled and USB debugging ON. Instructions on HOW TO enable ADB is also captured in the user guide.

- 1. Connect the device to the PC using the USB data cable or through the cradle.
- 2. You may need to pull down the top menu and if you see "USB for charging", touch it and then change it to "File transfers".
- 3. Open Command Prompt, run "adb devices" and check if you can see the device's serial number... If yes, proceed... if not, you will need to get the PC set up with the proper drivers or install an External SD Card.
- 4. You may also get a pop up on your PC (Win 7) that you will be connected as a Portable Media Player... this can be ignored.

Download Image

- a) CFE_ATLAS_02-13-15.00-OG-U18-STD.zip listed above in content section
- 5. Entering Recovery Mode
 - a. Choice 1: In Command Prompt, type "adb reboot recovery" and click enter.
 - b. Choice 2:
 - TC5x/TC7x: Reset and hold PTT key
 - VC80x: Reboot the VC80x using the power button menu and when the screen goes black, hold the Power and + buttons
 - MC33x/MC3300r: Reboot the device while holding the Pistol Grip Trigger (GUN Device) or the Right Scan Trigger (BRICK Device)

- When Zebra Technologies logo appears on the screen release the PTT Key/Buttons/Trigger
- 6. Your device will reboot and put you on the Android Recovery screen.
- 7. If applying update via sideload Method
 - a. Use the Volume + and to highlight, "Apply update from ADB" and press the Power key to select it for applying OS upgrade package
- 8. if applying update via External SD card
 - a. Use the Volume + and to highlight "Apply update from SD card" and press the Power Key to select it
 - b. Use the Volume + and to highlight package CFE_ATLAS_02-13-15.00-OG-U18-STD.zip and press the Power Key to select it.
 - c. Go to Step 10 once above steps are completed
- 9. With your Command Prompt open in the Host machine, type "adb sideload" command and add a space and then drag and drop the CFE_ATLAS_02-13-15.00-OG-U18-STD.zip file on to it and click enter.
 - a. Your PC screen will show files being installed and a little blue horizontal progress bar on your device will show status... and after about 6~ minutes (could be 10+ minutes if installing GMS) it should be done and you should be back at the Android Recovery screen.
- 10. "Reboot system now" is highlighted. Press the Power Key to Reboot.
- 11. At the Home Screen, we need to verify that the BSP upgrade took place and set the Date & Time.
 - a. Go to "Settings" and scroll down to "About phone" and look at the "Build number". It should start with "02-13-15.00-OG-U18-STD release keys". Now you are on the correct BSP.
- 12. Now you are all set to use your Zebra Device.

Known Issues and Limitations

- 1. USB audio headset is not supported on Workstation Cradle.
- 2. For an existing Data wedge profile which is configured for Image barcode scanning, if the user updates the profile for SimulScan data capture and reboots the device, the decoder list is shown as blank under DataWedge settings. As a workaround, user needs to use two different Data wedge profiles one for Imager barcode scanning and other profile for Simul scan data capture.
- 3. Velocity application stops if user use the Android Recent button to close Velocity app. As a workaround, user can close the application from the velocity application client menu.
- 4. Ethernet shows Connected state when device is configured with Static IP and placed in multislot cradle without Ethernet cable.
