Android Version	11
Security Patch level	April 5, 2022
Component Versions	Please see Component Versions under Addendum section

Device Support

The products supported in this release are WS50 product family.

Please see device compatibility details under Addendum Section.

New Features

Initial Release

Resolved Issues

Initial Release

Usage Notes

Initial Release

Known Constraints

- For optimal performance:
 - It is recommended that the sum of memory consumed by all installed applications should not exceed 350MB.
 - It is recommended to use DataWedge Intent API instead of Keyboard Wedge
- Bluetooth PAN, HID and OBEX profiles are not supported on this platform.
- DataWedge UI is limited to selection profiles. The profiles will need to be configured on another device and imported.
- Key Remapping and Ethernet Config need to be configured via EMM or StageNow.
- Recent app functionality is not supported on this platform.
- Full OTA packages are advised for Recovery mode OS updates.
- Delta OTA packages should be used with LifeGuard Over the Air (OTA) APIs or StageNow/MDM solution.
 - If applying Delta OTA package results in an error in recovery mode, please use corresponding Full OTA package.
- Full OTA packages are advised for Recovery mode OS updates.
- SPR46483 - My Lifeguard Update profile is failing reporting 'Not Supported Model'
