

Device Tracker 2.2.1

Release Notes - August 2019

Highlights

- Added new device support
- Added method to start server background services to run on startup and without a logged-in user

Device Support

Newly supported devices in this release:

- **Android P: TC52, TC72, PS20J**

See [all supported devices](#)

New in Device Tracker 2.2.1

New Method to Start Server Background Services

The Zebra DNA Visibility Console (ZDVC) server installer now creates two scheduled tasks:

1. ZDVC Backend Service
2. ZDVC Web UI Service

These services automatically run each time the server restarts regardless of whether a user is logged in. This eliminates the need to manually create these scheduled tasks.

About Device Tracker

Device Tracker is a centralized software solution for IT administrators and operations managers to track the presence and battery health of their Zebra Android devices and to help find misplaced devices within a facility. Device Tracker is included with the Zebra DNA Visibility Console standalone server solution. Learn more [about Device Tracker](#).
