- TC53 / TC58
- TC72 / TC77
- TC8300
- VC8300
- WT6300

## Usage Notes

- PTT Express Android client v4.0.x and above requires a Zebra license to use the application. Please refer to the Zebra Licensing User Guide for information on installing license for this application.
- PTT Express version 4.0.x cannot be installed on devices with Android 10 or below.
- PTT Express version 4.0.x cannot be installed on devices where PTT Express client is pre-installed.
- PTT Express version 4.0.x is only available via Managed Google Play Store.
- PTT Express version 4.0.x requires 'SYSTEM\_ALERT\_WINDOW' permission to be granted to operate.
- On PTT Express version 4.0.22202, when user presses PTT button to initiate PTT call, PTT Express application will no longer come to foreground if it was in background.
- On PTT Express version 4.0.22202, a new setting **talkPermitToneDelay** has been introduced. The amount of time that Permit Tone playback will be delayed by when the wired headset is connected. Decimal value in milliseconds: min=50ms max=1000ms. default = 50ms. When using USB-C headset, recommended delay of 250ms should be configured in order to hear Talk Permit Tone.

## Known Issues

- PTT Express notification icon can be seen in notification bar even when user disables the PTT Express service.

## About WFC PTT Express

WFC PTT Express allows enterprises to add secure push-to-talk (PTT) communications quickly and easily to a wide variety of Zebra devices, creating a powerful instant voice connection between your workers — without requiring the purchase of new devices or network/telephone infrastructure. With PTT Express, workers can initiate a broadcast PTT call, and call recipients can respond either to the entire group — or only to the original caller via the private response key.
