

WFC PTT Pro iOS Client Version 1.0.11052

Release Notes – September 2020

Highlights

Zebra is pleased to announce the WFC PTT Pro Generation 2 iOS client, v1.0.11052. The PTT Pro iOS client is part of the Zebra PTT Pro portfolio, which also includes an Android client and a Desktop for Windows client.

The WFC PTT Pro iOS client provides the advanced PTT features that PTT Pro is known for, as well as many other features:

- Group and Individual call
- Advanced push-to-talk features
- Contact lists with presence indications
- Locationing
- Secure messaging
- Profile Management
- Message of the day (MOTD) Feature Support

Device Support

The WFC PTT Pro iOS Client is supported on the iPhone and iPod Touch, iOS version 11 and above. The iPad may also be used; however, the application has not been optimized for the iPad. Landscape mode is not supported.

Features in WFC PTT Pro iOS Client v1.0.11052

Some of the many PTT Pro features are listed below. Refer to the manuals listed below for more details.

Group and individual calls

One-to-one and group calls are available. Groups can be predetermined, or the user can build an ad-hoc group.

Advanced push-to-talk features

The PTT Pro advanced push-to-talk features include alert calling, late join, barge calling, priority override, and more.

Contact lists with presence indications

Individual and group contact lists are supported, with presence indications to let the user know when contacts are available.

Locationing

Users can optionally be tracked and displayed on a map, enabling other users to contact those nearest them.

Secure messaging

Individual and group messaging is available.

Profile Management

The PTT Pro iOS client can be configured to receive profile information from the Profile Manager, an optional WFC service. This allows devices to be shared between multiple individuals.

Usage Notes

- The PTT Pro Generation 2 iOS client requires iOS 11 or higher. Manual or email installation is supported. Refer to the installation manual for more details.
- You must uninstall Generation 1 version of this application prior to installing Generation 2. Using both versions of the application on the same device is not supported.
- Application use is described in the quick start and user guides listed below.

Known issues

- N/A

About WFC PTT Pro

Workforce Connect PTT Pro connects your workforce with enterprise-class instant PTT and secure messaging services that support text, images, audio, and video. Now, workers can talk to any user or group with the press of a button — no more waiting for a callback or phone tag. You can barge into an ongoing PTT call in the event of an emergency — and you can set a Priority Caller level so that specific users will always override any call in progress. With User Presence information, workers can identify who is available before placing a call or sending a text, audio or video message to ensure an instant connection. And unlike consumer cellular standard text message services, all text messages are encrypted in-transit, meeting enterprise security needs. Services are available over cellular* and WiFi networks, so they are always available to your workers, regardless of where they are located. Visibility into the status of every user provides workers with the intelligence to select the best contact that is available to provide an answer, right now. And deployment couldn't be easier — just subscribe to these Workforce Connect PTT Pro cloud-based services and your workers are up and running. Get the power of one with Workforce Connect. One solution that provides enterprise-class PTT and secure messaging. One connected workforce. And all the communication services your workers need — data, voice and multi-media messaging — all on a single device.
