- VC8300
- WT6000
- WT6300

Note –

- For devices running Android 4.4 (KitKat), use WFC PTT Pro version 3.2.10087 or below.

New in WFC PTT Pro Android Client v3.3.10134

Support for Android 11

The PTT Pro client has been tested with Android 11.

Worker Duress

Worker Duress provides the means for staff to quickly raise an alert when in a duress or crisis situation. When a Duress Alert button is supported on a device, the button can be programmed through StageNow to initiate a PTT Pro call upon button press.

WFC Task Tracker (available upon request)

WFC Task Tracker is a Client/Server solution accessible via the PTT Pro client. It provides improved collaboration between associates through Task/Assignment workflows. After configuration of the Task Tracker web service, Associates and Supervisor (depending on role) have the ability to perform task actions (Create, Edit, Cancel, Accept, Complete) and determine status (Not Accepted, In Progress, Completed, Cancelled) through an intuitive user interface. Contact Zebra Support to enable Task Tracker. Task Tracker requires PTT Pro Android v3.3.10134 or higher.

Voice Command Support for French Canadian (Beta)

French Canadian voice commands are now supported as a Beta feature. Voice Command Support for French Canadian is enabled when French Canadian is enabled in the device.

Beta Features provides early availability to upcoming features scheduled for future General Production Releases. Beta features successfully undergo Zebra validation processes prior to consideration for external availability. Beta releases are intended to allow customers an opportunity to provide feedback prior to final productization.

Resolved Issues

- SPR 43929 - Map layers in PTT PRO seems not working if language is different than English.

Usage Notes

- Please note that accuracy of voice recognition for Voice Commands feature is dependent upon “Google” app on the device. Please make sure that device has the latest version of “Google” app installed. Google App can be manually updated by following steps described [here](#).

About WFC PTT Pro

Workforce Connect PTT Pro connects your workforce with enterprise-class instant PTT and secure messaging services that support text, images, audio, and video. Now, workers can talk to any user or group with the press of a button — no more waiting for a callback or phone tag. You can barge into an ongoing PTT call in the event of an emergency — and you can set a Priority Caller level so that specific users will always override any call in progress. With User Presence information, workers can identify who is available before placing a call or sending a text, audio or video message to ensure an instant connection. And unlike consumer cellular standard text message services, all text messages are encrypted in-transit, meeting enterprise security needs. Services are available over cellular* and WiFi networks, so they are always available to your workers, regardless of where they are located. Visibility into the status of every user provides workers with the intelligence to select the best contact that is available to provide an answer, right now. And deployment couldn't be easier — just subscribe to these Workforce Connect PTT Pro cloud-based services and your workers are up and running. Get the power of one with Workforce Connect. One solution that provides enterprise-class PTT and secure messaging. One connected workforce. And all the communication services your workers need — data, voice and multi-media messaging — all on a single device.
