

# Profile Manager Version 4.6.0

## Release Notes – October 2022

### Highlights

Release v4.6.0 offers

- Transfer role
- Role selection indicator
- Default role selection
- Maintenance Updates

### Device Support

#### Supported OS Platforms for Zebra Android devices

The following table lists the supported Android operating system platforms.

Operating System Platform	Version	API Level
Oreo	8.0.0 and 8.1.0	26 and 27
Pie	9	28
Android 10	10	29
Android 11	11	30

#### Supported OS Platforms for IOS devices

Refer to the PTT Pro IOS User Guide for supported iOS versions.

### New in Profile Manager v4.6.0

#### Transfer Role

The Transfer Role feature allows a requesting user to select and use a role that is already in use by another user. The second user will receive a notification allowing them to accept or reject the request. If approved, or no response is received, the role is transferred to the requesting user.

The customer can enable/disable the ability to transfer roles in tenant configuration. If enabled in tenant configuration, it can be enabled/disabled in the user role configuration.

#### Role Selection Indicator

An indicator has been added to the Role Selection Screen to indicate the maximum roles that can be selected and how many roles are currently selected.

## Default Role Persistence

Default Role Persistence allows a default role to be selected and persisted for each user, providing a smoother and quicker login experience for users who rarely change roles. Users may change their default role by navigating to the Role Selection Screen.

## WFC Profile Manager 4.5.0 Components

### Client versions:

	Service	version
1	WFC Profile Client	2.0.22201
2	WFC Voice G2	9.0.22207
3	WFC PTT Pro	3.3.10186

### UI Build:

	Service	version
1	UI-Portal	1.31.17

## Resolved Issues

None

## Known Issues

None

## Usage Notes

- Profile Manager v4.6.0 is compatible and has been released together with WFC Profile Client v2.0.22201. Profile Manager v4.6.0 is also compatible with the previous 2 releases of profile client.
- Note that the location of the log and configuration files have changed in the Profile Client due to Android 11 requirements.

## Documentation

The following documents can be found at <https://www.zebra.com/us/en/support-downloads/software/productivity-apps/profile-manager.html>.

Document Name	Description
<b>MN-003433:</b> Profile Manager Administrator's Guide	A guide detailing the Zebra WFC Profile Manager portal user interface (dashboard) for administrators or technical representatives to manage an organization's use of mobile devices.
<b>MN-003602:</b> Profile Manager Client Device User's Guide	A user guide for the WFC Profile Client, a device application providing a secure login interface for access to WFC applications. Upon login, the WFC Profile Client provides access to configured applications such as WFC Voice and WFC PTT Pro.
<b>MN-003636:</b> Workforce Connect Active Directory Connector Install & Config Guide	A guide describing how to install and configure Active Directory (AD) Connector running on the customer site with the Profile Manager running on the Cloud.
<b>MN-003720:</b> WFC Profile Client Applications Install & Config Guide for Administrator	A guide explaining on a high level how to "mass install" WFC client applications on client devices. This guide is MDM independent and shows adb commands.
<b>MN-004351:</b> WFC Profile Client Configuration and Programmer guide	A guide describing the configuration parameters of the WFC client, as well as the intents required to configure the client, log into and out of the client, and request status of the client.
<b>MN-004414:</b> WFC Profile Manager Provisioning Guide	A guide describing the available methods of importing users into the Profile Manager.

## About Profile Manager

Connect your entire workforce with Zebra's Workforce Connect Profile Manager Solution via Zebra-Hosted Cloud environment that interoperates with Zebra voice and/or push-to-talk services (sold separately). Workers inside or outside the four walls depend on their Mobile Devices for real-time access to business applications. To maximize productivity, your workforce needs to be able to reach co-workers, customers, supervisors, remote experts and more. WFC Profile Manager connects to customer data services in the cloud, authenticates, automates, and enables multiple user role selection for dynamic line extensions or push-to-talk groups on a shared device.
