

WFC Provisioning Manager Version 3.1.23108

Release Notes – July 2023

Highlights

Release v3.1.23108 of the WFC Provisioning Manager is now available for customer access. This release contains the following features.

- Simplified voice licensing
- Peak license usage identification in dashboard
- Improved identification of devices using premium licenses
- Maintenance updates

New in WFC Provisioning Manager v3.1.23108

Simplified Voice Licensing

Customers will now see only Premium and Standard licenses in their Licenses Summary tab, corresponding more exactly with what the customer purchased.

! Important: Note that as part of license simplification, premium licenses can only be used for premium PBXs. Standard PBXs require standard licenses. Customer with premium licenses should ensure that their devices are all configured to use premium PBXs. See the WFC Voice Licensing Guide and the Provisioning Manager Customer Admin guide for more information.

! Important: Extension Managers are upgraded after the Provisioning Manager is upgraded. Extension Managers on releases prior to 3.0.23106 may display anomalies in totals until they are upgraded to 3.0.2316.

Improved Identification of Devices using Premium Licenses

To identify all devices using premium licenses, customers previously needed to add up devices with “In Use” licenses as well as “Not In Use(*)” on the Licenses Assigned tab. An extra column has now been added to that tab which identifies all devices using premium licenses using the filter “Assigned”.

Peak License Usage Identification

The dashboard has been enhanced to provide the peak license utilization per day, regardless of when that peak occurred.

Resolved Issues

- None

Usage Notes

- The Provisioning Manager URL is <https://wfc-provisioning1.pttpro.zebra.com/admin/login>. To request portal access to the WFC Provisioning Manager, contact Zebra support.

- Bootstrapping is supported with the following client versions:

Client	First GA Release with bootstrapping
WFC Voice	9.0.20207
PTT Pro Android	3.3.10107
Profile Client	2.0.20207

- Feature-based licensing as provided by the Provisioning Manager is first supported in WFC Voice v9.0.20306. The customer may view the licensed devices in the Provisioning Manager portal, in the Licensing/Assigned tab.
- The customer may release standard licenses from specific devices by obsoleting them in the Extension Manager portal, in the Portal/Devices tab.
- **Important:** Note that premium licenses can only be used for premium PBXs. Standard PBXs require standard licenses. Customer with premium licenses should ensure that their devices are all configured to use premium PBXs.
- Licensing notes:
 - Existing 9.x customers upgrading to WFC Voice v9.0.20306 must contact Zebra to enable the migration of their current licenses to AID-free licensing.
 - Licenses for the WFC Voice Client 9.x may include a 30-day grace period. The client will display the expiration date including the 30-day grace period, but any renewals will be based off the actual expiration date. Refer to your entitlement email from Zebra Onboarding for your actual expiration date.
- 3rd party device support for stand-alone clients requires the following client versions:
 - WFC-Voice v9.0.22308 or above (WFC Voice is not supported on iOS devices)
 - PTT Pro Android v3.3.10197 or above
 - PTT Pro iOS v1.0.11086 or above

Refer to PFM release notes for client versions supporting 3rd party devices using PFM deployments.

Known Issues

- None
