

WFC Provisioning Manager Version 2.10.34

Release Notes - June 2022

Highlights

Release v2.10.34 of the WFC Provisioning Manager is now available to customer access. This release only contains maintenance updates.

New in WFC Provisioning Manager v2.10.34

No new features were added in this release of the Provisioning Manager.

Resolved Issues

- Password reset emails sometimes failed to reach the destination portal user, due to the originating email address. This has been rectified.

Usage Notes

- To request access to the WFC Provisioning Manager, contact Zebra support.
- Bootstrapping is supported with the following client versions:

Client	First GA Release with bootstrapping
WFC Voice	9.0.20207
PTT Pro Android	3.3.10107
Profile Client	2.0.20207

- Feature-based licensing as provided by the Provisioning Manager is first supported in WFC Voice v9.0.20306. The customer may view the licensed devices in the Provisioning Manager portal, in the Licensing/Assigned tab.
- The customer may release standard licenses from specific devices by obsoleting them in the Extension Manager portal, in the Portal/Devices tab.

Licensing notes:

- Existing 9.x customers upgrading to WFC Voice v9.0.20306 must contact Zebra to enable the migration of their current licenses to AID-free licensing.
- Licenses for the WFC Voice Client 9.x may include a 30-day grace period. The client will display the expiration date including the 30-day grace period, but any renewals will be based off the actual expiration date. Refer to your entitlement email from Zebra Onboarding for your actual expiration date.

Known Issues

- None

Documentation

The following documentation is available at <https://www.zebra.com/us/en/support-downloads/software/productivity-apps/provisioning-manager.html>:
