

# Zebra DNA Cloud 3.2

## Release Notes – Aug. 2023

### Highlights

- An enhanced "Enroll" function allows LifeGuard enrollment for automatic updates if enrollment failed earlier
- Supports show / hide column functionality in ZDNA portal
- Zebra Collection now includes Device Central client app
- Zebra Collection now displays updated logos for all Zebra apps

### Device Support

Required minimum LG software updates:

Device Models	Supported OS	Device Software Location
ET40/ET45	11-13-14.00-RG-U00 or later	<a href="#">Go to download page</a>
TC15	11-14-13.00-RG-U00 or later	<a href="#">Go to download page</a>
TC53	11-12-31.00-RG-U00 or later	<a href="#">Go to download page</a>
TC58	11-12-31.00-RG-U00 or later	<a href="#">Go to download page</a>
WS50	11-19-19.00-RN-U00 or later	<a href="#">Go to download page</a>
All <b>SDM660-platform</b> devices running <b>Android 11</b>	11-26-05.00-RG-U00 or later	<a href="#">Go to download page</a>

### New Features in ZDNA 3.2

- **Show / hide column functionality in ZDNA portal**
  - Administrators can now easily show or hide columns in the ZDNA portal, displaying only the required column(s) on the page
- **Zebra Collection**
  - Administrator can now install Device Central app into devices through ZDNA

### Usage Notes

- Administrators managing mixed device-owner populations can now perform remote support for devices managed by SOTI

### Requirements

- Refer to the [System Requirements](#) section in ZDNA documentation

### Known Issues

- When deploying a Profile containing a Zebra app to WS50 devices with an LG update of 11-19-19.00-RN-U00 or later, the installation status appears **incorrectly** as “Issue.”
- When deploying a Profile containing a Zebra app to SDM660-, 6490- and 6375-platform devices with the minimum LG update shown above, the installation status appears **incorrectly** as “Issue.” [See platform device lists.](#)
- APN profile configured through Device Settings (Advanced) displays the status incorrectly, but the functionality works correctly on the device.
- When first booting (or rebooting from either a cold boot or hard reset), all Zebra devices running Android 13 (or later) must be unlocked (using PIN, password or pattern) before the DNA Cloud client app will launch. Also applies to 6490- and 6375-platform devices running Android 11.
- Configuring NFC settings sometimes displays an error despite being applied properly on the device.
- When creating a managed configuration for Enterprise Keyboard, remapping a programmable key requires two backslash (“\\”) characters (rather than one, as documented).

## About Zebra DNA Cloud

[Zebra DNA Cloud](#) integrates our Mobility DNA portfolio solutions into a single, intuitively organized interface. By harnessing our existing software's capabilities, we offer customers and partners secure solutions that help deploy, manage and support every stage of device lifecycles. With Zebra DNA Cloud, organizations can tailor device settings to meet their specific needs by leveraging Mobility Extensions (Mx). Application management and configuration of Mobility DNA tools will ensure users have access to the Zebra applications required to accomplish their work. Administrators can leverage LifeGuard OTA to ensure their devices are always up to date with the latest features and security, all with a single click and without having to touch each device physically.
