Introduction

This package clean-boots the MC31xx terminal which is running with WCE6.0 operating system and puts the terminal into default factory settings. If it is required, it also cleans the Application folder. This package is also compatible with MC3190 having Toshiba Flash (SPR#22259).

Description

1. The 31xxc61xxxCB000001.zip contains an OSUpdate utility package which will help to clean boot the terminal.
2. The 31xxc61xxxDBA00002.zip contains an OSUpdate utility package which will help to clean boot and blank the application folder (it will erase all existing applications in the Application folder).
