Cleaning and Disinfecting Zebra MC40-HC Mobile Computers

The Zebra MC40-HC mobile computer is hard at work in healthcare facilities around the world. The fully-featured pocket sized device helps improve patient safety, the patient experience and staff productivity.

Just as with other devices that come into contact with patients, surfaces and healthcare workers, the MC40-HC should be cleaned after use with every patient and disinfected at regular intervals to reduce the risks associated with the spread of healthcare associated infections (HAIs) and microorganisms. The MC40-HC was specifically designed and built for the rigors of healthcare environments and can withstand repeated cleaning and disinfecting practices. It is important to use approved cleaning and disinfectant products to ensure that HAIs and microorganisms are removed and that the device is protected.

FACT SHEET

CLEANING AND DISINFECTING ZEBRA MC40-HC MOBILE COMPUTERS
