EMEA	Movilizer	Movilizer PMCS	Android	The ideal solution for mobile maintenance and customer service. This innovative approach provides you with the following advantages: In general if you have similar processes and consequently functional requirements comparable to others in your industry, you still need an individual process flow for your special application areas. Using the Movilizer, you can structure the sequence of your processes and process steps individually within the mobile application. However, mobile maintenance and service management are not isolated applications for this. The Movilizer provides you the option of integrating additional functionalities from areas such as materials management and resource planning in the mobile process. You can also allocate the various role-based processes of the SAP System to your technicians and service staff and do this independent of specific mobile terminals of Zebra.	Manufacturing	TC55	**Zebra Enterprise Compatible**

NA	Zebra Technologies	Enterprise Browser Demo	Android	Enterprise Browser is a powerful, next generation industrial browser enabling developers to build feature rich web applications that integrate seamlessly with the features in Zebra Technologies' Mobile computers and peripherals – such as barcode scanning, signature capture, printing and more. Enterprise Browser applications leverage standard web technologies (HTML5, CSS, and JavaScript) to run and integrate with virtually any Zebra devices. With support for legacy APIs used in PocketBrowser and RE Shared Runtime, Enterprise Browser is the ideal path forward for developers migrating legacy web based applications to newer devices or creating new highly-graphical applications. Enterprise Browser features will speed up your application development time, reducing costs and making the transition to next generation devices and operating systems fast, easy and affordable. Built from the ground up around best-in-class development practices and designed to support new operating systems and devices, Enterprise Browser is an entirely better way to create web based enterprise applications.
