

WT6000 Application Guide

Region	Partner	Application	Platform	Description	Verticals	Zebra Product	Program Status
NA	Stay Linked	Stay Linked Client	Android	StayLinked is the only Terminal Emulation (TE) product specifically designed for wireless environments. Traditional TE solutions are, by the nature of their architecture and transport layer, incapable of dealing with the real-world inconsistencies of both Wifi and Cellular wireless networks. StayLinked TE delivers very secure, high-speed terminal emulation while completely eliminating dropped sessions.		WT6000	Zebra Enterprise Validated
NA	BCC Distribution	TranASAP	Android	BCC Distribution are experts in many industries and offer numerous solutions within each one. The company focus on SAP applications in the warehouse, especially for manufacturers, distributors and retailers, where material is constantly in motion. Warehouse workers are consistently performing tasks that include Receiving, Put-away, Replenishment, Picking, Packing and Shipping.	Manufacturing	WT6000	Zebra Enterprise Compatible
NA	Dematic Reddwerks	System Directed Selecting	Android	A mobile application used by selectors in distribution centers to confirm the picking of discrete quantities of products into totes.	Manufacturing	WT6000	Zebra Enterprise Compatible
NA	Lucas Systems, Inc	Lucas Move/Jennifer	Android	Lucas Move, featuring Jennifer, is the core component of our voice picking and Mobile Work Execution solutions. Lucas Move streamlines hands-on processes for warehouse associates who wear headsets and a mobile computer, leaving their eyes and hands-free to focus on their work. DCs can choose to use Move with rugged smartphones or a range of other voice-capable mobile computers, avoiding the costs of proprietary hardware, and getting all the benefits of using new smart devices and wearables. NA	Quest Solution	Quest Solution Order Entry	Android	Put an end to the "blind order" aspect of your current remote order entry system by providing much needed information to your mobile workers with Quest Solution's Order Entry product. It allows two-way communication with your field personnel - as sales orders are sent in, customer and pricing information is updated on the handheld device. Eliminate the time-consuming and error-prone process of faxing or phoning in orders with legacy equipment.	Human Services, Transportation & Logistics	TC8000, WT6000	Zebra Enterprise Compatible
EMEA	TSF INFORMATICA INDUSTRIAL S.L.	WMS SACA	Android	The WMS (warehouse management system) software program SACA, allows to control palletized warehouse replenishment areas as well as picking, giving to the user the greatest flexibility to define warehouse zones, picking and replenishment procedures, storage strategies, etc. It is a suite of modular architecture, which supports , based in a central core and optional modules, almost any type of devices and working procedures, from RF terminals to guide operators in all the warehouse tasks, as part reception, putaway, inventory and picking (including wave picking, pick to box and voice picking) to horizontal rotary picking machines (carousels) and vertical ones (paternosters), to "pick to light" displays and miniloads and cranes, etc .
