

ZEBRA OEM SOLUTIONS HELP IMPROVE PATIENT SAFETY, INCREASE STAFF PRODUCTIVITY AND MEET REGULATORY REQUIREMENTS, QUICKLY AND COST EFFECTIVELY

ONLY ZEBRA'S OEM TEAM CAN OFFER ITS UNMATCHED LEVEL OF EXPERIENCE, RELIABILITY, CUSTOMIZATION AND LONG-TERM SUPPORT IN THE HEALTHCARE INDUSTRY – A PARTNERSHIP YOU CAN COUNT ON TODAY AND WELL INTO THE FUTURE

Technology offers healthcare a world of opportunity to transform the patient experience. Today, Zebra's proven solutions are helping of healthcare professionals make more informed decisions, access critical information in real-time to increase accuracy, enhance patient safety, better manage assets, and improve overall efficiency.

On a typical day, a nurse or clinician spends 2-3 hours of their 8-hour shift on administrative tasks such as documentation; time that could be better spent caring for patients. Just consider the process of collecting data, often captured manually, and the multiple translations to finally enter it into a patient database. Or time spent finding a cardiologist, or searching for missing equipment such as a \$50,000 infusion pump in a sprawling healthcare facility, when every minute counts.

Technology solutions for these situations need to be developed with care:

- Devices must meet regulatory requirements
- Data must be both accurate and secure
- Solutions must integrate seamlessly into the healthcare information system (HIS)

Many healthcare organizations turn to custom solutions to meet their unique requirements. Whether it's simply branded devices or truly unique "stock keeping units" (SKUs) they can control, it can be a costly and time-consuming effort. They need to know that the components being utilized will actually work together and not run afoul of their legal obligations. Healthcare providers also want to take advantage of the cloud and "Internet of Things," but can't take any risk with patient confidentiality.

SOLUTION BRIEF

ZEBRA OEM HEALTHCARE SOLUTIONS

That's where we come in. At Zebra, we are the original equipment manufacturer (OEM) partner that understands the needs of healthcare, from single-point "products" to fully integrated solutions that work in concert across an entire healthcare organization. This expertise enables us to develop solutions around your business' or customers' specific needs better than anyone else. The breadth and depth of innovation, engineering know-how and experience we bring to address business challenges is why so many respected global brands trust Zebra to help their businesses succeed.

Zebra's OEM solutions can speed your time to market cost effectively and OEM healthcare is part of our overall Healthcare Solutions offering that support healthcare Identity, Mobility and Intelligence needs. Our portfolio of high return-on-investment solutions are built on proven, scalable, flexible technology solutions that deliver benefits to healthcare organizations, whether private label or custom engineered.

Identity

Zebra's identity solutions enable positive patient identification for medication administration and specimen collection, while protecting patient safety and rights and improving workflows. We combine industry-leading hardware and accessories, custom software from Zebra's app development community, as well as unique healthcare media such as wristbands and labels.

Mobility

Zebra's mobility solutions improve healthcare staff productivity. Our innovative, purpose-designed mobile computing devices consolidate work tools, systems and processes, allowing caregivers to spend time where it matters most - with patients. Whether it's a rugged or industrial-grade device (with healthcare grade plastics) or a tablet, chances are we have a proven product ready to meet your needs for instant, informed and collaborative care.

Intelligence

Zebra's visionary products, software and real-time location solutions provide greater visibility and intelligence. They not only make patient care smarter and more connected than ever, they also reduce waste and lower costs. Visibility into the location and health of patients, staff and each critical asset provides the difference between guessing and knowing, through solutions that enable tracking of patients, staff and hospital assets and improved supply chain management.

ZEBRA'S OEM HEALTHCARE SOLUTIONS MEET YOUR CUSTOMERS' NEEDS FOR REGULATORY-COMPLIANT SOLUTIONS QUICKLY, RELIABLY AND COST EFFECTIVELY

Nobody understands you and your customers' needs better than Zebra, and no other OEM can offer what we can, including:

- A comprehensive ecosystem of hardware and software solutions, ranging from components to private label finished products, from printers, scanners to mobile computers and RFID.
- A product development perspective—not a parts catalog, but a challenge-solving relationship that approaches your customers' needs for a technology solution at a competitive cost.
- Investment stability. Our 1700+ engineers develop new products annually and Zebra has more than 4500 US and international patents issued and pending. We provide our customers with a road map of our products for planning, and support our customers and our products long after the sale.

Faster time to market. Lower cost.

Regulatory compliance. Customer service

Our OEM customers have the peace of mind that comes from knowing they are working with an experienced and proven partner that helped them get to market faster and less expensively. Turn possibility into new practice and contact the Zebra team now to get started on a solution designed to meet your specific needs.

Building a fully-connected, mobile healthcare information hub

Challenge:

Global Healthcare Information Technology (HCIT supplier) required a mobile solution to support their proprietary software to integrate with alarms and the hospitals PBX for secure texting, medication administration and positive patient ID.

Solution:

Supplier-branded MC40 HC mobile computer. Rugged, reliable and disinfectant ready, the MC40 delivered advanced scanning capabilities and integrated with the HCIT supplier's software to support voice communications, nurse call and other healthcare applications.

Benefit:

Improved staff productivity and patient safety and reduced time to market.
