**ZC100 Card Printer**

**NEXT GENERATION SIMPLICITY AND SECURITY IN A ‘FIT EVERYWHERE’ DESIGN**

Whether you need to print single-sided employee identity badges or membership and event guest cards, card printing is a crucial aspect of your business. Deployment flexibility and the time it takes to print and manage your card printing solutions all have an impact on your business — from your brand image to staff productivity, overall operational efficiency and operating costs. Now, there’s a new kind of card printer designed to address it all — the ZC100. You get groundbreaking simple operation and the slimmest fit-everywhere design, along with a toolbox of additional capabilities that make the ZC100 even easier to integrate, use and manage. The ZC100 — when only the best single-sided card printer will do.

**Innovative new driver with a graphical user interface**

The intuitive interface in the newly-designed driver makes it easier than ever to print cards. Settings are grouped logically into tabs where they are easily accessible with a click. A visual display of your card allows you to instantly see how your card looks and how setting changes impact card design — eliminating the time and cost to repeatedly print test cards.

**Revolutionary new hopper design**

The completely re-designed hopper makes loading and unloading cards easier than ever. With the saloon-style output doors, there’s nothing to open — just grab one card or the whole stack of cards. And the input and output hoppers have the same capacity, reducing the need to refill and empty the hoppers.

**Fool-proof ribbon changing**

Changing a ribbon has never been so simple and uncomplicated — no instructions required. Unlock and open the newly designed ribbon door latch in one motion. The unique door-handle style grip leaves no question about how to remove or insert the ribbon. The snug-fit design has no play or adjacent open areas, so there’s never a question about whether the ribbon is installed correctly and in the proper place. And with embedded smartchips, you always know when to change the ribbon.

**Effortless manual card feed**

Manually feeding a card can be complicated — we made it simple with a lightpipe that guides the user through the manual feeding process, the same way that automatic teller machines guide users through their interaction.

**We speak your language**

Workers can interact with the ZC100 in their native tongue with driver support for multiple languages — English, French, Italian, Spanish, Portuguese (Brazilian), German, Polish, Russian, Simplified Chinese and Arabic.

**Ground-breaking ‘fits everywhere’ design**

**Good looks that fit in anywhere**

Even though the ZC100 is built for business, it has the consumer good looks required to fit in customer facing areas, from the retail store to the hospital admission desk.

**Sized to fit wherever you need printing**

Your printer shouldn’t dictate where you can issue cards — it should fit wherever card printing is needed. From the minimal footprint and the slimmest profile to the lowest clearance in this printer class, the ZC100 was designed to fit in the most possible places — including under a counter or shelf.

**All the connectivity options you need**

Connect to one computer through the onboard USB to create a standalone printing station. Or, add optional Ethernet or Wi-Fi to give everyone who needs card printing instant access, maximizing printer usage. And improve deployment flexibility with Wi-Fi — the time and cost to run network cabling to your printers is eliminated.

**Printer cover lock**

The printer cover lock prevents the theft of card stock, providing the security required to install in public-facing areas.

---

**STEP UP TO THE NEXT GENERATION IN CARD PRINTING WITH THE ZC100.**

Advanced security

Printer and host authentication
Advanced security features enable printer-to-host authentication to prevent printing from unauthorized applications or devices.

AES data encryption
Government-grade encryption protects the most sensitive data during printing, such as account numbers.

Fast and flexible printing

Fast single-sided color and monochrome printing
We took a good thing and made it better. The ZC100 prints up to 30% faster in monochrome and 15% faster in color than its predecessor, Zebra’s ZXP Series 1 card printers.

Basic encoding options
Whether you are printing employee badges, ID cards, season passes and membership cards or credit and debit cards, you can choose the encoding option of your choice. Add a ‘swipe-and-go’ magnetic stripe when you print cards. Or use the ZIP Pocket with our new Software Development Kits (SDKs) to easily add a third party contactless encoder to create ‘pass through’ contactless cards.

Boost value with new capabilities and the right support

Get unmatched value with Print DNA — only from Zebra
The printer hardware is just the start of what you need to maximize the value of your printers. That’s why we created Print DNA — because what’s inside your printer matters. The Print DNA family of solutions brings unmatched ease of use, ease of integration and security to card printing, streamlining your business processes, improving operational efficiency and reducing development and deployment time and cost.

Protect your investment with Zebra’s superior support services
No matter what level of support you need, there is a Zebra support service that is just right for your business. With Zebra OneCare, no matter what happens to your printer, it’s covered. If you just need access to technical support, choose Zebra’s Technical Software and Support (TSS). And if you want help setting up and configuring the hundreds of settings on local and remote ZC100 printers, our Install & Configuration Assistance (ICA) Select program provides the support you need.

The ZC100 is ideal in many applications, including:

Retail/Hospitality
• Membership cards
• Events and season passes
• Guest and passenger cards
• Food safety labeling

Identification
• Employee badges
• Visitor badges
• K-12 identification and facility access

ZC100 Card Printer Specifications

**OPERATING CHARACTERISTICS**

**Environmental**
- Operating Temperature: 59º F to 95º F/15º C to 35º C
- Operating Humidity: 20% to 80% non-condensing
- Media Storage:
  - Temperature: 41º F to 77º F/5º C to 25º C
  - Humidity: 35% to 65% non-condensing

**Electrical**
- Auto-switching single-phase AC power
- Operating range: 90-132VAC and 190-264VAC RMS
- Frequency range: 47-63 Hz
- FCC Class A

**PHYSICAL CHARACTERISTICS**

**Dimensions**
- 10.2 in. H x 6.2 in. W x 15.1 in. D
- 258 mm H x 157 mm W x 383 mm D

**Weight**
- 8.6 lbs (3.9 kg)

**COMMUNICATIONS AND INTERFACE CAPABILITIES**

- USB 2.0 — Standard
- Built-in 10/100 Ethernet — Optional
- 802.11ac — Optional

**ENCODING OPTIONS AND SPECIFICATIONS**

- Magnetic stripe encoder — ISO 7811 (new and pre-encoded; tracks 1, 2, and 3; high and low coercivity, stripe down; 30 mil cards only) *
- Third party contactless encoder integration kit (ZIP Pocket)*

**PRINTER DRIVERS**

**Microsoft**
- Windows Server 2008 (32 and 64 bit)
- Windows 7 (32 and 64 bit)
- Windows 8 and Windows 8.1 (32 bit and 64 bit compatible)
- Windows Server 2012 (64 bit)
- Windows 10 (32 bit and 64 bit)

**Linux**
- Ubuntu 16.X (64 Bit)

**Apple**
- MAC OS X 10.13.X ( 64 bit)

*Field upgradeable options

**MEDIA SPECIFICATIONS**

**Supplies Specifications:**
- The ZC100 printer is designed to work only with Zebra genuine ribbons. Ribbons are included in a simple-to-load cartridge.

| Ribbon Description | Cartridge Image Count | YMCKO*       | 200 |
|--------------------|-----------------------|--------------|
| ½ YMCKO*           | 400                   | Black Monochrome* | 2000 |
| Black Monochrome*  | 1500                  | White Monochrome* | 1500 |
| Red Monochrome     | 1500                  | Blue Monochrome  | 1500 |
| Gold Monochrome    | 1500                  | Silver Monochrome| 1500 |

*Zebra intelligent technology automatically detects and authenticates ribbon

**Card Compatibility:**
- For optimum print quality and printer performance, use of Genuine Zebra supplies is recommended.
  - Card Thickness: 10-40 mil
  - Card Size: CR80 ISO 7810 ID-1 format, CR79
  - Card Material: PVC and PVC composite
  - Adhesive back and writable back cards
  - Spot color or monochrome printing only on < 20 mil thick cards and CR79 cards

*Continued on back*
ZC100 Card Printer Specifications (continued)

**ADDITIONAL OPTIONAL FEATURES**
- Lockable enclosure (field upgradeable option)

**PRINT DNA**
- Multiplatform Software Development Kit (SDK)
  - Windows C#/.Net and Java Printer Software Development Kit (SDK)
  - One SDK supports Android, Java and Windows environments
  - Easily build card-printing apps with complete control over print functionality from Windows, Linux, Mac OS and Android environments
  - Enable card printing from Android mobile devices
  - Incorporate encryption and host authentication (Windows only)
  - Includes documentation and source code examples

**CardStudio**
A simple-to-learn and feature-rich card design software that makes it easy to design loyalty cards, gift cards, ID cards and more.

**Print Touch**
With a single tap, you can use Android-based mobile devices to access how-to and troubleshooting information to help keep printers up, running and available.

**About Print DNA.** Print DNA propels your Zebra Link-OS for Card printers into a class of their own, providing Zebra-only software tools that make life easier for everyone who touches your printers, from printing to printer management and application development.
