

Printer Setup Utility for Android Supporting Zebra Link-OS Printers

SIMPLIFYING PRINTER SETUP AND CONFIGURATION FOR ZEBRA LINK-OS® PRINTERS

The faster you get new equipment up and running, the more quickly you can achieve your return on investment. With Zebra's Printer Setup Utility for Android™, configuring your Link-OS printers to optimize performance is easy – no specialized knowledge required.

An Easy Way to Configure Your Printers

Just download Zebra's Printer Setup Utility app on your Android mobile device and tap the printer you wish to configure. Your printer and device will instantly begin communicating via Bluetooth. Then follow the simple setup wizard that walks you through how to set specific printing parameters – such as calibration, media type, ribbon, printer language and security – to optimize performance.

Bluetooth Printers Are Now Configurable – Even in the Field

Traditionally, Bluetooth printers are not easily managed – particularly when the printers are used in the field by a mobile workforce. Zebra's Printer Setup Utility for Android makes Bluetooth printers manageable via the Cloud by allowing you to retrieve files from Box or Dropbox and then transfer these files to your printers for faster configuration and easier software updates. This simplifies the management of your Bluetooth printers, dramatically improving your return on investment and increasing the productivity of your mobile workforce.
