

Zebra MotionWorks® Warehouse

Powered by Zebra Savanna™

Visibility of Assets in Motion Elevates Your Business

Implement the System of Reality in your Warehouse

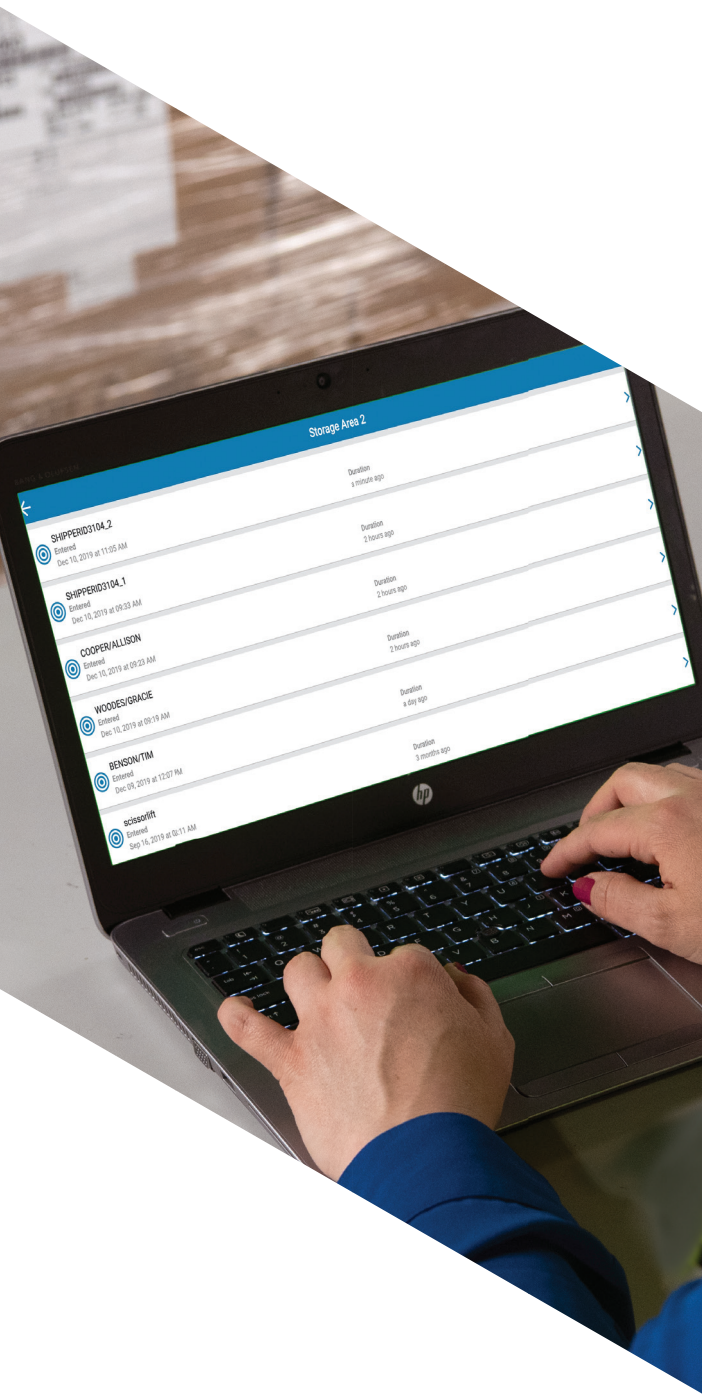

Your warehouse has never been more challenged

- You're challenged with profitability and rising logistics costs to keep up with explosive volume growth
- The labor market has never been tighter
- You don't have accurate visibility to the whereabouts of your assets
- Higher SLAs & customer expectations demand faster service
- Your assets—people and equipment—are underutilized and inefficient

If you can't measure or monitor your assets as they move through your warehouse, you can't optimally manage your business.

Get The Complete Picture Of Your Operations In Near Real-Time

Zebra MotionWorks® Warehouse is a near real-time location solution, optimized for handling large volumes of assets at the rapid pace that today's warehouse demands. It provides immediate ROI by allowing you to see exactly where critical assets are whether they're stationary or in motion, enabling you to automate transactions, streamline workflows, reduce labor and improve accuracy.

Zebra MotionWorks Warehouse system of reality gives you near real-time actionable data for these real world benefits:

Improve shipment verification and validation

Generates a real-time, digitized manifest which immediately verifies receipt and shipment of assets, simultaneously highlighting discrepancies from the system of record.

Reduce labor

Directed instructions streamline worker activity and improve asset utilization while providing you with a centralized dashboard to monitor work in progress. Plus, alerts and notifications inform everyone on critical issues in near real-time.

Increase accuracy

Automated transactions reduce manual processes, so your workers can enjoy faster order processing, improving accuracy and security.

Integrate into existing management systems

No need to start all over with your in-house business systems. MotionWorks™ Warehouse fits right in with your existing enterprise management systems to improve your operations.

Turn Raw Data Into Real-Time Benefits

Zebra MotionWorks® Warehouse is powered by Zebra Savanna™, a data intelligence platform that uses advanced analysis and machine learning to transform raw edge data into insights you can use to make your warehouse faster and more efficient, delivering real results like these:

- Enables directed workflows for increased productivity, reducing labor
- Increases asset and forklift utilization
- Reveals real-time location of assets
- Increases predictability in operations
- Increases employee engagement
- Helps you improve processes over time with operational intelligence
- Creates an audit trail for security and quality control
- Goods movement based on priority

Real World Use Case Scenarios

The best way to see how Zebra MotionWorks® Warehouse helps your operation work smarter is to see it in action. Here are a few dashboards to help you see the big picture benefits:

Shipping Accuracy and Integrity

- Eliminate mis-shipments to customer
- Meet critical shipment times
- Auditable chain of custody reduces lost inventory
- Reduction in time spent looking for missing assets

Tracking Finished Goods in Manufacturing

- Eliminating steps in workflow increases number of goods/asset that can be processed
- Reduces time to collate all goods assigned to an order
- Decrease in goods stored in inventory before shipment
- Auditable record of events reduces lost inventory
- Reduction in time spent looking for missing assets
- Near real-time notification of discrepancies for immediate resolution, reducing costly penalties

Workflow Optimization

- Reduce labor with more efficient workflows
- More efficient use of time and assets
- Eliminating steps in workflow increases number of goods/asset that can be processed
- Auditable record of events reduces lost inventory
- Reduction in time spent looking for missing assets
- Near real-time notification of discrepancies for immediate resolution, reducing costly penalties

Keep Your Workers In Motion. And You In The Know.

MotionWorks™ Warehouse Software

- Zone Manager
- Location Data Aggregation
- Asset Identification & Association
- Automated Scanning
- MotionWorks Warehouse Historical API for reporting

Business Application

- Visibility Dashboard
- Facility Manager Dashboard
- Electronic Manifest
- Solution Configuration Management & Monitoring

Sensing Hardware

- ATR7000 Phased Array Reader
- Ultra-Wideband RTLS
- Zebra ZBR4000 Advanced Passive RFID Tag

Professional and Support Services

- Solution Jumpstart
- Solution Validation
- Software Integration
- Learning as a Service
- Workflow Design & Consulting
- MotionWorks Signature Service

Stay Connected. Stay In Control. With Zebra's End-To-End Solutions.

Zebra MotionWorks® provides expertise to build and implement end-to-end location solutions that automatically sense the location of your assets and inventory. It helps you streamline your workflows, while allowing you to ramp up productivity, boost efficiency and grow your business. By delineating that data to arm your enterprise with actionable insights, you can optimize your business at the performance edge.

We have the hardware to capture data, including Zebra's many sensing, tagging and mobility technologies. Plus, MotionWorks™ Warehouse is built to integrate with third-party technologies.

MotionWorks Warehouse is built on the Zebra Savanna platform. It captures location data and, using proven algorithms and rules engines, it derives actionable information and business context. And because MotionWorks Warehouse provides a common set of outputs, all this data can be shared with other applications.

Success in any intelligent edge solution requires a knowledgeable set of professional services to truly be successful. Zebra MotionWorks is no exception.

Zebra provides a set of Location Solution-specific professional capabilities as part of its Signature Services Portfolio. With these, you can be confident that the unique services necessary for the successful business outcome of your location-based solution are available when you need them.

Zebra MotionWorks® Warehouse changes the game by integrating into your existing back-end system. It generates data to give you clear visibility into your operation, helping you make real-time decisions. Because when you can take immediate action, you're never a step behind. You're always two steps ahead.

Put your operation into perfect focus. And focus on what really matters: success. Learn more about MotionWorks™ Warehouse. Only from Zebra.

Contact Zebra to set up a Discovery Session, where our Location experts will build a solution that meets the unique needs of your business
