

Secure Mobile Solutions for Today's Federal Workforce

The federal government is going mobile. With a workforce of over two million employees—nearly half of whom regularly work in remote locations—the need to enable secure anywhere, anytime communications is greater than ever.

Unleashing the Power of Mobility

No longer hindered by the confines of the office, frontline Federal workers have access to a new generation of enterprise-grade mobile devices that are increasingly vital in increasing efficiencies and enhancing communications and collaboration. Sophisticated capabilities, including high-resolution digital cameras, GPS receivers, motion sensors, multiple wireless and cellular interfaces and much more, are improving productivity and accelerating mission-focused government initiatives.

Threat Assessment

Yet, even as these new capabilities enhance workforce performance, the need for security is greater than ever. In fact, a recent Department of Homeland Security study³ found that threats to federal government use of mobile devices exist across all elements of the mobile ecosystem—and require a security approach different from the protections developed for desktop workstations.

Genetic Code

Zebra understands that security is critical to the workflows of federal agencies. That's why every mobile device, solution and service features embedded intelligence. We call that Zebra DNA, a portfolio of software, applications and utilities designed to maximize protections and reduce security-related risks. With our smart, configurable technology, you can balance operational objectives with security, in real time, in the real world.

Custom Solutions

For agencies who want to disable features and functionality permanently, Zebra will work with you to configure your devices and settings with adjusted security levels. Based on your agency's specific requirements, we can configure devices right at the factory by disabling specific features and capabilities in the device's firmware and deliver secure, out-of-the-box solutions. So, you can supply your workforce with purpose-built devices that are secure and ready to work, right out of the box.

² Market Connections, "Why Agencies Need To Remove Barriers to Mobile Device Usage"

³ Department of Homeland Security, "DHS S&T Study on Mobile Device Security"

According to a recent study by Frost and Sullivan, **nearly half of all government employees work in a remote location on a regular basis.**¹

86% of federal decision makers believe mobile devices are critical to their jobs.²

A Powerful Portfolio of Mobile Solutions

Zebra's best-in-class mobile technology solutions enable federal agencies to fulfill their missions—from asset tracking to protection of critical infrastructure. Our powerful mobile devices empower the mobile workforce with 24/7 access to critical networks, while helping agencies enhance endpoint security and contain costs.

Zebra Rugged Tablets combine consumer styling with enterprise-class features, purpose-built to power a wide range of mobile workflows for federal government workers inside the office and in the field.

ET51/ET56

Offers the best of both worlds—the flexibility to choose functionality with the aesthetic appeal of a consumer-grade tablet—all at an affordable price. Choice of Android or Windows operating system for compatibility with existing WLAN and screen sizes. Use inside the office or out in the field.

XSLATE/XPAD L10

Rugged, lightweight, waterproof and dustproof tablet for easy handling and transport for office, vehicle or field-based applications. Available in an industry-leading variety of tablet configurations and accessories. Choose Windows or Android operating system and range of RAM and storage options.

XSLATE R12

A next-generation tablet with all the high-performance features and computing functions you need in a single platform. Powerful 2-in-1 capabilities with a Bluetooth-connected keyboard in “stow and go” mode.

Zebra Handheld Mobile Computers provide workers in the office and the field with immediate access to the critical information, applications and people they need to get the job done.

TC52

Delivers enterprise-touch computing with familiar Android apps.

TC72

The ultimate ultra-rugged all-touch computer for workers inside and outside the office.

MC3300/MC33XR

Offers more models, scanning options, rugged design, RFID reader and advanced accessories.

Zebra Printers are designed for the harshest environments, easily integrate into your agency's systems and help you keep pace with evolving challenges.

ZQ520 Mobile Printer

A best-in-class rugged mobile printer for applications outside the office. Optimized for touch environments, it is ideal for on-the-go employees who depend on maximum printer flexibility.

ZQ620 Mobile Printer

Features advanced technology and an innovative design that drives productivity, ease of use and manageability for everyday use.

ZT510 Tabletop Printer

Provides proven, durable design and construction with advanced management and monitoring.

ZT610 Tabletop Printer

Combines rugged durability and exceptional performance on a user-friendly, future-ready platform.

Zebra DNA is a portfolio of software, applications and utilities that transform your mobile devices into true enterprise solutions. Every solution in the Zebra DNA portfolio is designed to minimize your vulnerability and reduce security-related risks.

Mobility DNA is a software ecosystem that transforms the Android OS into an enterprise-ready force that heightens productivity, simplifies management and eases integration.

Device Tracker makes it easy to track and find all your lost and misplaced Zebra Android devices, with no need for additional infrastructure.

Enterprise Home Screen improves workforce productivity by ensuring that your agency's devices are used only for work.

Print DNA produces high-performing, remotely managed printers that are easy to integrate and secure.

DataCapture DNA simplifies the Zebra scanning experience and transforms Zebra scanners into powerful enterprise tools.

Mobile Solutions for Critical Missions

Even as mobility enables increases in workforce performance, the need to protect data on the mobile devices used by the federal workforce has never been more urgent.

Federal agencies must be able to prevent access by unauthorized users, use secure networks and set strict parameters for workers seeking to access sensitive data on those networks.

At Zebra, we work with federal agencies to connect your assets, people and data to enable informed decision making. In addition to providing mobile solutions that deliver the highest levels of security, we continue to ensure that our growing portfolio of mobile devices adhere to the most relevant security standards.

Our mobile devices incorporate leading security features, and many have been validated to comply with FIPS and TAA standards as well as MIL-STD-810G Department of Defense durability standards. In addition, our Android mobile computers and mobile printers have earned many IP ratings for resilience—meeting IP ratings for dust and water resistance.

Zebra rugged devices offer the best of both worlds—access to intuitive, consumer-style, easy-to-use apps and enhanced security protections.
