

Zebra RFID: Track Materials. Increase Accuracy. Transform the Laboratory.

With volume demands increasing, pharmaceutical workflows have rapidly grown larger and more complex — making it tougher to sustain visibility and accuracy in an industry that demands compliance. Discover the solution with this deep dive into RFID technology from Zebra.

Challenge: Complex Inventory Processes

Sudden demand fluctuations and increased regulations created complex inventory processes, making it hard to track chemical compounds, equipment and finished products.

Mismanaged inventory can quickly lead to larger issues, such as:

- Inefficiency
- Shortages and overages
- Expired materials
- Poor access control
- Limited product visibility
- Inaccurate records
- Unreliable quality control
- Noncompliance

These larger compliance issues are problematic and expensive — so you need to master them before they lead to costly delays, lost productivity, and diminished quality control.

Solution: A Complete RFID Portfolio

Make the transition to RFID. Connect all materials, equipment, products and workers on one platform — without disrupting your workflows — with Zebra solutions. Take advantage of our interoperable portfolio to achieve accurate material counts and visibility into worker and product movements. Get all the tools you need to maximize productivity while minimizing time and expense.

With the industry's broadest, field-proven portfolio, Zebra gives you maximum gains without the hassles that come with multi-vendor solutions.

Transform Workflows with Zebra's Powerful RFID Portfolio

Portfolios	What it Does	How it Helps	Product
RFID Readers	<ul style="list-style-type: none"> Speed through material and product inventory faster than ever before. Pinpoint product locations for easy access. 	<ul style="list-style-type: none"> Maximize material and avoid shortages. Complete more frequent counts or additional safety controls with time saved. Identify discrepancies as soon as they occur. 	RFD8500 Attachment
			MC3300R RFID Mobile Computer
			DS9908R Hybrid Scanner
	Track employee movement and direction	Optimize workflow for maximum efficiency.	ATR7000 Array Reader
	Attach fixed readers to track chain of custody and control access to your premises and materials.	Improve security of controlled substances and safeguard product.	RFID Fixed Readers: FX9600, FX7500
RFID Printers	<ul style="list-style-type: none"> Create RFID labels, tags and cards when you need them. Print for all surfaces, even metal. 	Make tags quickly and to your specifications to ensure everything is tracked.	ZD520R RFID Desktop/Cart Mount Printer
			ZQ520R Mobile Label Printer
			ZC350 Card Printer
			ZT411 Industrial RFID Printer
Mobile Computers	<ul style="list-style-type: none"> Get alerts for expired products. Access data from anywhere, whether in the lab or the product warehouse. 	<ul style="list-style-type: none"> Limit medication and chemical compound expirations and maximize use. Speed workflows and access to information. 	TC2X, TC5X, TC7X Touch Computers, ET5X Mobile Computers, L10 Tablets
			MC3300R Mobile Computer
Zebra-Certified Supplies	Affix inlays to standard surfaces, liquid-filled containers or even metal.	Get optimal performance built for your technology.	RFID Inlays
	Customize supplies for your chemical and temperature applications.	Ensure tags don't degrade over time or chemical exposure.	Custom Supplies

Transform Your Pharma Laboratory Operations

Gain insight into your pharmaceutical operations and reach compliance standards with a complete RFID solution from Zebra.
