

ZEBRA

Zebra's Pharmacy Labelling Solutions

IDENTIFY MEDICINES SAFELY AND EASILY

Accurate Pharmacy Labelling

Scanning barcode labels, produced by reliable Zebra® thermal printers enables pharmacists to automatically verify and record medication dispensing as well as check the prescription order to validate that the correct medication and dosage were dispensed.

Easy and Reliable

Each year over 900 million items are dispensed throughout England and Wales alone. Regardless of how many pharmaceuticals are received a certain amount of re-packaging or re-labelling is required. Zebra can meet all on-demand barcode labelling needs, whether repackaging bulk products delivered to pharmacies, or printing dosage instructions for patients.

Zebra thermal printers and labels produce barcodes used for dispensing — those same barcodes then enable bedside medication administration. The optimal approach for maximising patient safety is to add barcoded variable data to every drug in a pharmacy.

High Quality

NHS UK recommendations are that medication dispensing labels should include;

- Patient name
- Name and address of the dispensing pharmacy
- Dispensing date
- Medicine name
- Dosage instructions
- Amount of medicine in the container and the strength
- Cautions or warning messages that apply to your medicine

Zebra Certified Supplies are thoroughly tested to ensure the best print quality time after time. With sharp text and clear barcodes, labels scan quickly and reliably. Crucially, information is clearly legible for patients taking the medication. A variety of adhesives are available, which ensure the printed labels remain on the medication even with difficult applications such as labelling textured boxes, paper bags and items which are stored in the fridge.

Dispensing Label Solutions

Dispensing labels should be no smaller than 35mm x 70mm so that all printable information is readable, ensuring the correct medication in the correct dosage is administered to the correct patient. Zebra's recommend part numbers for dispensing labels are below:

Zebra Material	Label Size	Part Number
Z-Perform 1000D	35mm x 70mm	3013549 (desktop, custom)
Z-Perform 1000D	70mm x 32mm	880181-031D (desktop, ZipShip)
Z-Select 2000D	57mm x 76mm	3007209-T (desktop, ZipShip)

Zebra has worked with many leaders in barcode patient safety initiatives to develop printers and supplies that meet healthcare providers' needs for reliability, performance, ease of use and seamless connectivity to information systems.
