Laboratory Specimen Management
COVID-19 Pandemic Response

High Volumes of Specimen Testing Require High-Performance Lab Management
An infection outbreak dramatically increases laboratory staff’s workloads with:
- Increased volume of specimen testing
- More pressure to get results turnaround quickly
- No room for errors

Simplify and Manage Data Capture
DataCapture DNA empowers clinicians with a suite of tools to manage the entire Zebra scanning experience

Scan Barcode and RFID Specimen Sample Labels

- Leverage immediate data capture
- Reduce specimen identification errors
- Increase workflow efficiency

Print Barcode and RFID Labels

- Easily print barcode and RFID specimen labels
- Use direct thermal technology to safeguard patient information for HIPPA compliance

Connect for Ongoing Clinical Collaboration

- Connect staff for ongoing communication
- Push-to-talk (PTT) services over cellular and Wi-Fi networks
- Secure text messaging

Optimizing Speed, Safety and Accuracy for Laboratory Specimen Management

Fast
Immediate data capture streamlines workflows
Real-time workflow visibility connects staff for collaboration

Accurate
Scanning and data capture reduces manual-entry errors
Barcode technology links specimen samples to Positive Patient Identification

Safe & Compliant
Enable appropriate disinfecting of handheld devices
Ability to connect to EHR and other providers to quickly determine the proper care needed
Maintain HIPPA compliance
