CRADLE MODEM COUNTRY CONFIGURATOR VERSION 6.0 RELEASE NOTES

INTRODUCTION

This is a Control Panel applet which gives an easy way for a user to check what country the CRD5500-1000XR and CRD5501-1000XR Modem cradle is currently set to as well as changing to any other supported country.

This CAB installer will create a new Control Panel Applet to set the correct modem settings for different countries for the CRD5500-1000XR and CRD5501-1000XR cradle Modem.

DESCRIPTION

· Feature described above is delivered via the CAB file CRD550X_MDMCONFIG_V6.CAB

· This CAB installer will create a new Control Panel Applet which allows setting the correct modem settings for different countries for the CRD5500-1000XR and CRD5501-1000XR cradle Modem.

· Once a new country is selected, the Applet will send the appropriate data to the cradle which will be saved into the Cradle flash.

V6 Changes
· Added Support for Singapore
